

On the March 20, 2017 call, the CSAC reviewed an appeal of measure #0351: *PSI 04 - Death rate among surgical inpatients with serious treatable complications* (AHRQ). On Friday, March 24, 2017, prior to the close of the CSAC voting period, AHRQ confirmed with NQF that they wanted to withdraw the measure from further consideration. As with other measures withdrawn at this stage of the Consensus Development Process, information in the Surgery Final Report and in the Quality Positioning System will indicate that the measure has been withdrawn by the measure steward and that NQF endorsement will be removed.
