

## Measure 525 – Adherence to Antiplatelet Therapy After Stent Implantation

### Denominator Algorithm

**Measure 525- Adherence to Antiplatelet Therapy After Stent Implantation:** Average proportion of days covered (PDC) for individuals with antiplatelet therapy during the 12 months following implantation of a coronary artery drug-eluting stent (DES) or a bare-metal stent (BMS)

**Denominator:** The sum of the days measured for all individuals who undergo a coronary artery DES or BMS placement at any time during the first 12 months of the 24-month measurement period and have at least 2 prescriptions for antiplatelet therapy during the 12 months following stent placement

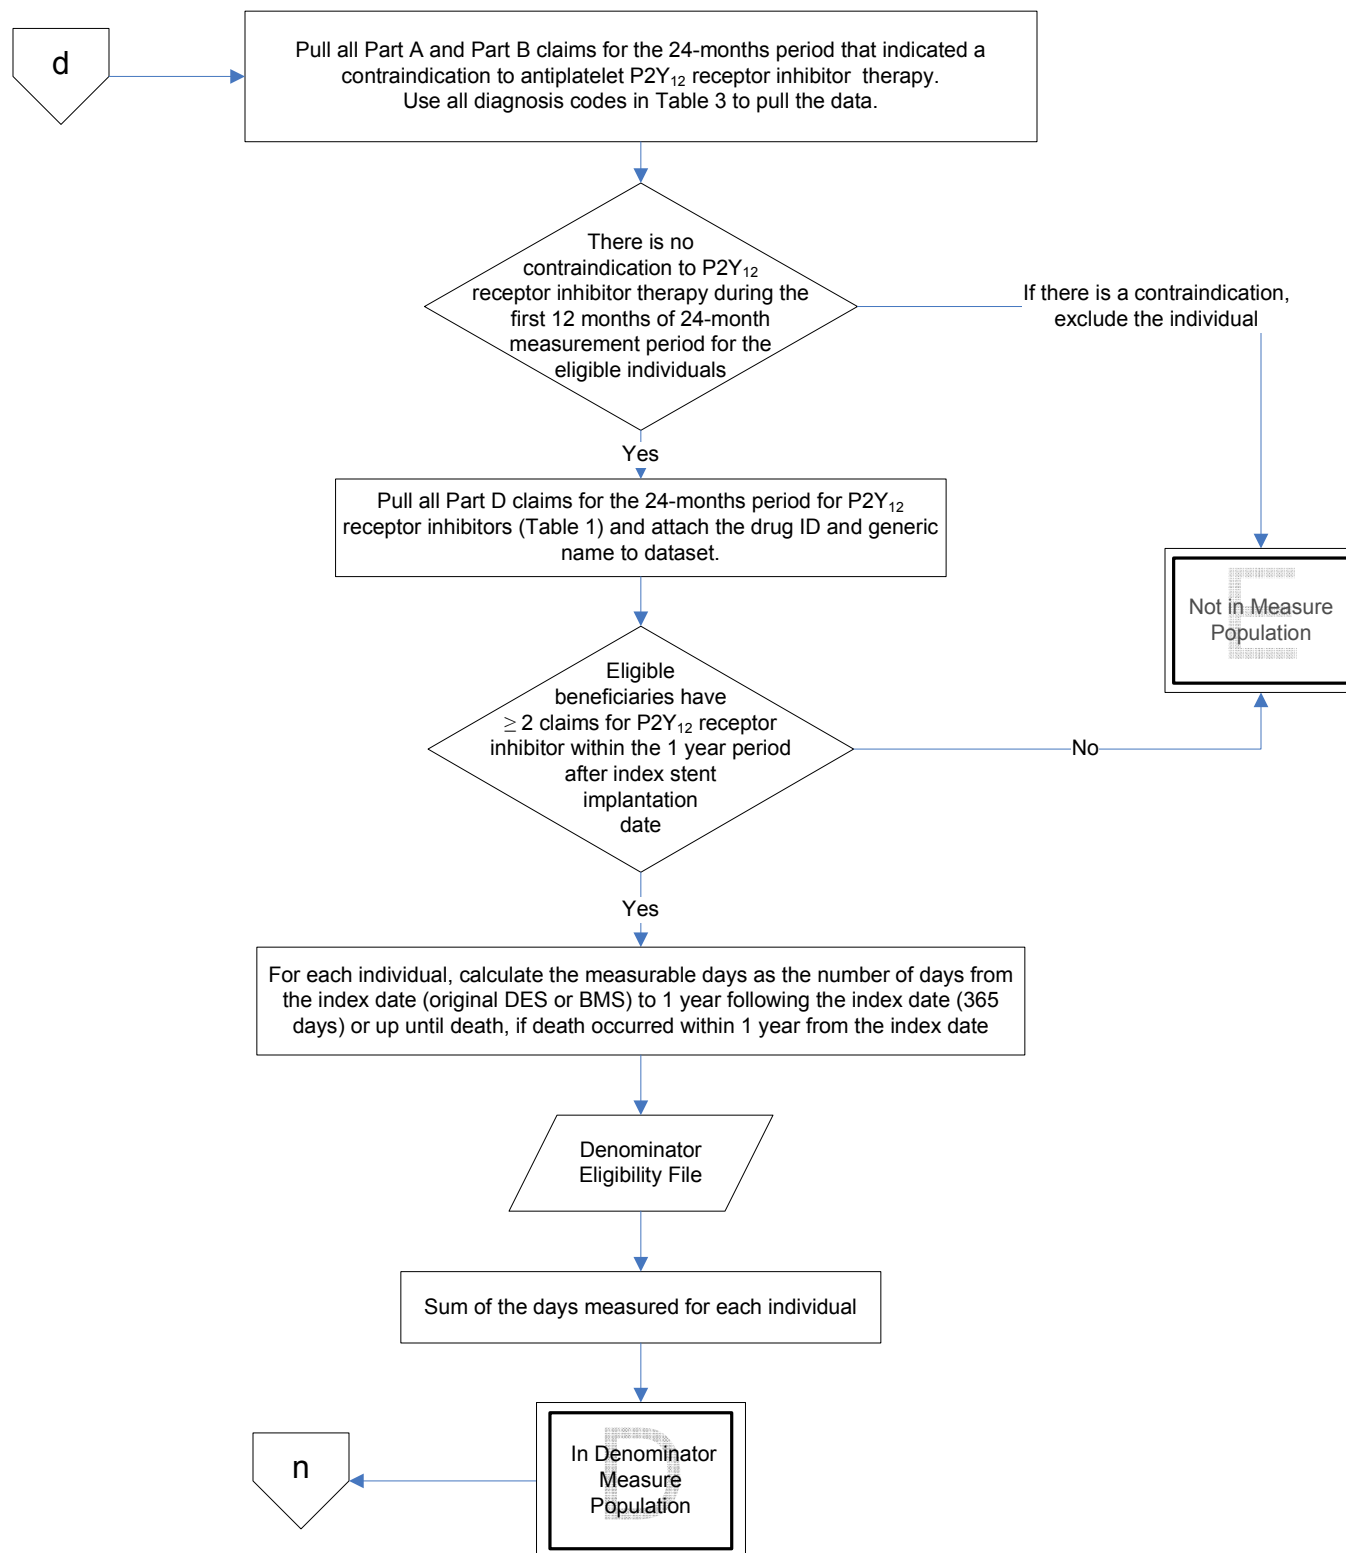

## Measure 525 – Adherence to Antiplatelet Therapy After Stent Implantation

### Denominator Algorithm

**Measure 525- Adherence to Antiplatelet Therapy After Stent Implantation:** Average proportion of days covered (PDC) for individuals with antiplatelet therapy during the 12 months following implantation of a coronary artery drug-eluting stent (DES) or a bare-metal stent (BMS)

**Denominator:** The sum of the days measured for all individuals who undergo a coronary artery DES or BMS placement at any time during the first 12 months of the 24-month measurement period and have at least 2 prescriptions for antiplatelet therapy during the 12 months following stent placement

## Measure 525 – Adherence to Antiplatelet Therapy After Stent Implantation

### Numerator Algorithm

**Measure 525- Adherence to Antiplatelet Therapy After Stent Implantation:** Average proportion of days covered (PDC) for individuals with antiplatelet therapy during the 12 months following implantation of a coronary artery drug-eluting stent (DES) or a bare-metal stent (BMS)

**Numerator:** The sum of the days covered by the days' supply of all antiplatelet prescriptions during the days measured in the denominator
