

Measure 701a: Glycemic Control – Hyperglycemia

Denominator Algorithm

Measure 701a: Average percentage of hyperglycemic hospital days for individuals with a diagnosis of diabetes mellitus, anti-diabetic drugs (except metformin) administered, or at least one elevated glucose level during the hospital stay

Denominator: Total number of admissions with a diagnosis of diabetes mellitus, at least one administration of insulin or any anti-diabetic medication except Metformin, or at least one elevated blood glucose value (>200mg/dL [11.1mmol/L]) at any time during the entire hospital stay

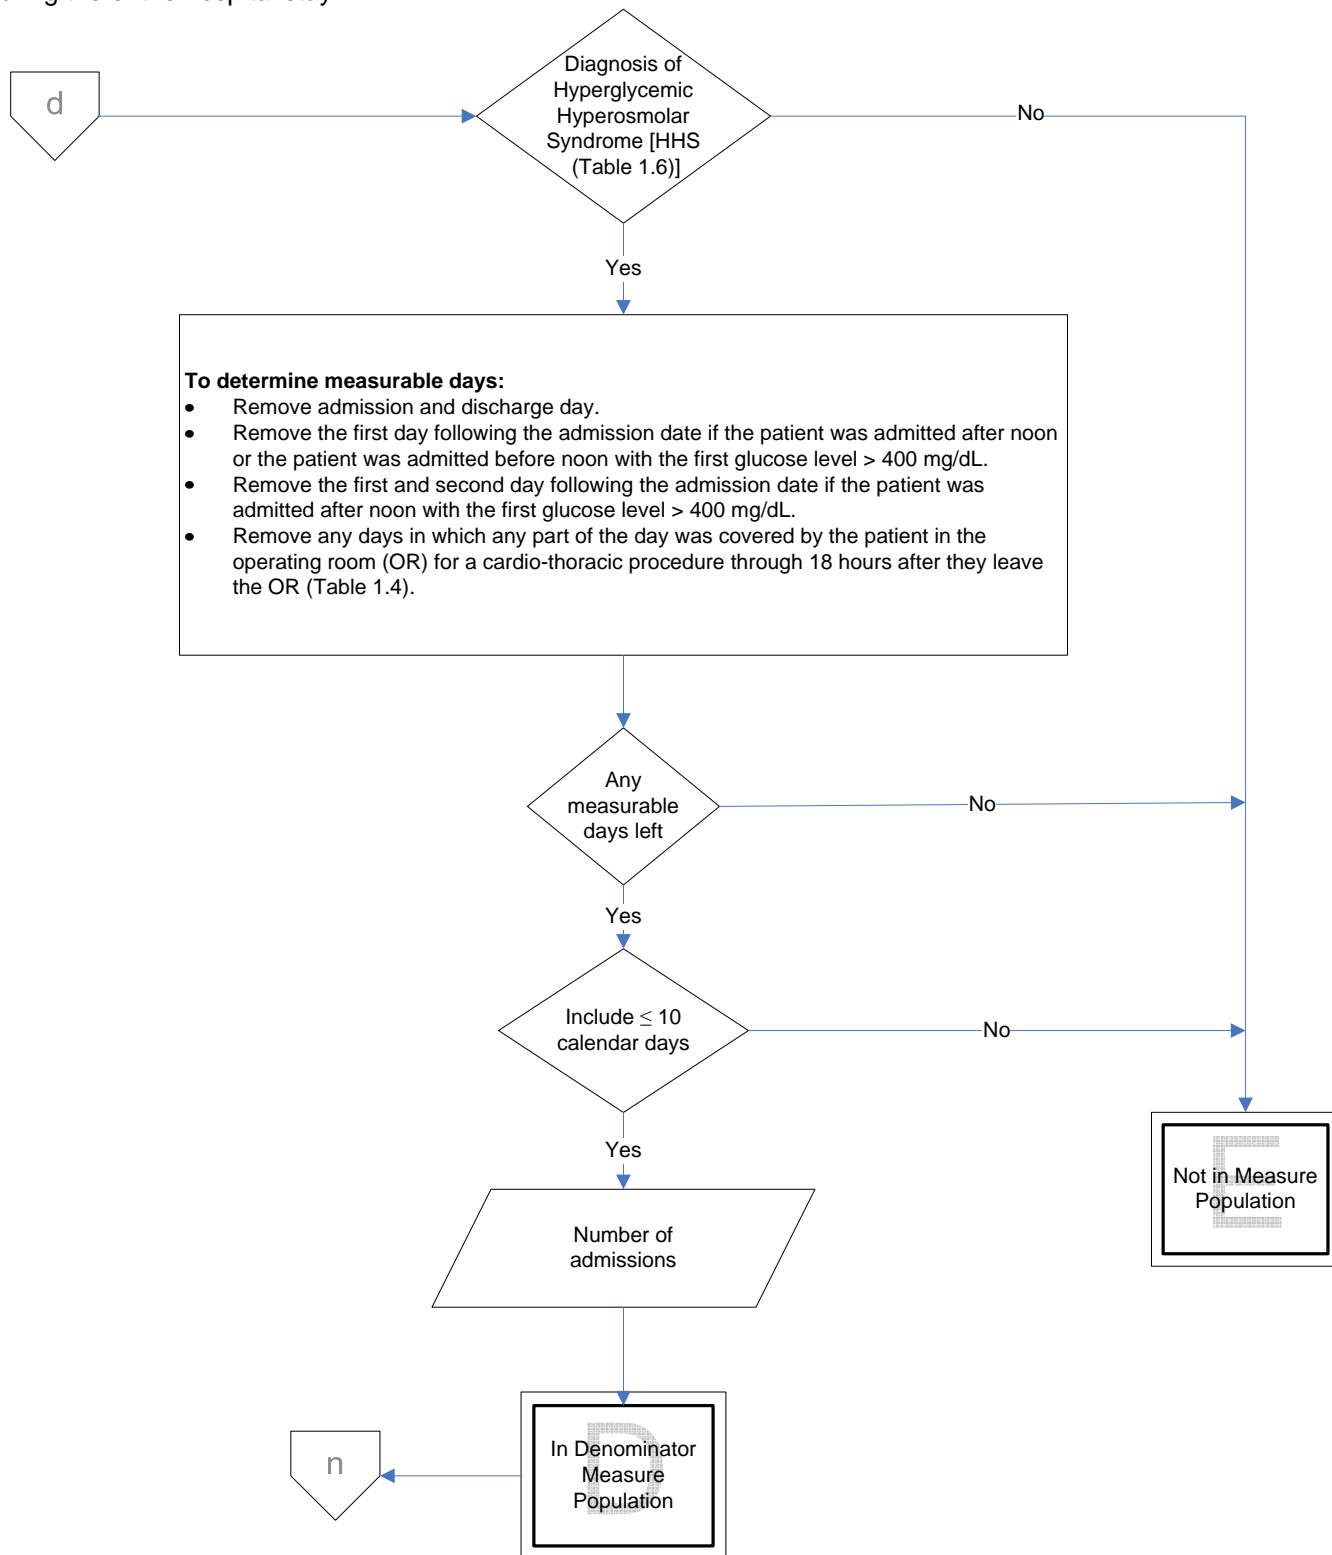

Measure 701a: Glycemic Control – Hyperglycemia

Denominator Algorithm

Measure 701a: Average percentage of hyperglycemic hospital days for individuals with a diagnosis of diabetes mellitus, anti-diabetic drugs (except metformin) administered, or at least one elevated glucose level during the hospital stay

Denominator: Total number of admissions with a diagnosis of diabetes mellitus, at least one administration of insulin or any anti-diabetic medication except Metformin, or at least one elevated blood glucose value ($>200\text{mg/dL}$ [11.1mmol/L]) at any time during the entire hospital stay

Measure 701a: Glycemic Control – Hyperglycemia

Numerator Algorithm

Measure 701a: Average percentage of hyperglycemic hospital days for individuals with a diagnosis of diabetes mellitus, anti-diabetic drugs (except metformin) administered, or at least one elevated glucose level during the hospital stay

Numerator: Sum of the percentage of hospital days in hyperglycemia for each admission in the denominator
