

	Measure 0487: EHR with EDI prescribing used in encounters where a prescribing event occurred. (City of New York Department of Health and Mental Hygiene)
Description	Of all patient encounters within the past month that used an electronic health record (EHR) with electronic data interchange (EDI) where a prescribing event occurred, how many used EDI for the prescribing event.
Numerator	Number of encounters using an electronic health record (EHR) with EDI, where EDI was used for a prescribing event.
Numerator Details	
Denominator	All patient encounters where medication prescribing occurred
Denominator Details	
Exclusions	<ol style="list-style-type: none"> 1. controlled substance(s) requiring non-EDI prescription are printed, or 2. prescriptions are printed due to patient preference for non-EDI prescription and indicated in a structured and auditable format, or 3. no prescriptions are generated during the encounter, or 4. the receiving-end of EDI transmission is inoperable and unable to receive EDI transmission at the time of prescribing.
Exclusion details	
Risk Adjustment	No risk adjustment or risk stratification
Stratification	
Numerator Time window	12 months
Type	Structure
Type of Score	Rate/proportion
Data Source	Electronic Clinical Data, Electronic Clinical Data : Electronic Health Record, Electronic Clinical Data : Pharmacy
Level	Clinician : Individual
Setting	Ambulatory Care : Clinician Office/Clinic

Created on: 01/30/2014 at 11:16 PM

Measure 0495: Median Time from ED Arrival to ED Departure for Admitted ED Patients (Centers for Medicare and Medicaid Services)	
Description	Median time from emergency department arrival to time of departure from the emergency room for patients admitted to the facility from the emergency department
Numerator	Continuous Variable Statement: Time (in minutes) from ED arrival to ED departure for patients admitted to the facility from the emergency department.
Numerator Details	Continuous Variable Statement: Time (in minutes) from ED arrival to ED departure for patients admitted to the facility from the emergency department.
Denominator	Continuous Variable Statement: Time (in minutes) from ED arrival to ED departure for patients admitted to the facility from the emergency department.
Denominator Details	<p>Any ED Patient from the facility's emergency department.</p> <p>Data Element Name: ED Patient</p> <p>Collected For: ED-1, ED-2</p> <p>Definition: Patient received care in a dedicated emergency department of the facility.</p> <p>Suggested Data Collection Question: Was the patient an ED patient at the facility?</p> <p>Allowable Values:</p> <p>Y (Yes) There is documentation the patient was an ED patient.</p> <p>N (No) There is no documentation the patient was an ED patient, OR unable to determine from medical record documentation.</p> <p>Notes for Abstraction:</p> <ul style="list-style-type: none"> • For the purposes of this data element an ED patient is defined as any patient receiving care or services in the Emergency Department. • Patients seen in an Urgent Care, ER Fast Track, etc. are not considered an ED patient unless they received services in the emergency department at the facility (e.g., patient treated at an urgent care and transferred to the main campus ED is considered an ED patient, but a patient seen at the urgent care and transferred to the hospital as a direct admit would not be considered an ED patient). • Patients presenting to the ED who do not receive care or services in the ED abstract as a "No" (e.g., patient is sent to hospital from physician office and presents to ED triage and is instructed to proceed straight to floor). • Patients presenting to the ED for outpatient services such as lab work etc. will abstract as a "Yes". <p>ED:</p>

	<ul style="list-style-type: none"> • If a patient is transferred in from any emergency department (ED) or observation unit OUTSIDE of your hospital, select “No”. This applies even if the emergency department or observation unit is part of your hospital’s system (e.g., your hospital’s free-standing or satellite emergency department), has a shared medical record or provider number, or is in close proximity. Select “No”, even if the transferred patient is seen in this facility’s ED. • If the patient is transferred to your hospital from an outside hospital where he was an inpatient or outpatient, select “No”. This applies even if the two hospitals are close in proximity, part of the same hospital system, have the same provider number, and/or there is one medical record. Select “No”, even if the transferred patient is seen in this facility’s ED. <p>Suggested Data Sources:</p> <ul style="list-style-type: none"> • Emergency department record • Face sheet • Registration form <p>Inclusion Guidelines for Abstraction: None</p> <p>Exclusion Guidelines for Abstraction:</p> <ul style="list-style-type: none"> • Urgent Care • Fast Track ED • Terms synonymous with Urgent Care
Exclusions	Patients who are not an ED Patient
Exclusion details	<p>All non-ED patients are excluded from this measure.</p> <p>Data Element Name: ED Patient</p> <p>Collected For: ED-1, ED-2</p> <p>Definition: Patient received care in a dedicated emergency department of the facility.</p> <p>Suggested Data Collection Question: Was the patient an ED patient at the facility?</p> <p>Allowable Values:</p> <p>Y (Yes) There is documentation the patient was an ED patient.</p> <p>N (No) There is no documentation the patient was an ED patient, OR unable to determine from medical record documentation.</p> <p>Notes for Abstraction:</p> <ul style="list-style-type: none"> • For the purposes of this data element an ED patient is defined as any patient receiving care or services in the Emergency Department. • Patients seen in an Urgent Care, ER Fast Track, etc. are not considered an ED patient unless they received services in the emergency department at the facility (e.g., patient treated at an urgent care and transferred to the main campus ED is considered an ED patient, but a patient seen at the urgent care and transferred to the hospital as a direct admit would not be considered an ED patient).

	<ul style="list-style-type: none"> • Patients presenting to the ED who do not receive care or services in the ED abstract as a “No” (e.g., patient is sent to hospital from physician office and presents to ED triage and is instructed to proceed straight to floor). • Patients presenting to the ED for outpatient services such as lab work etc. will abstract as a “Yes”. <p>ED:</p> <ul style="list-style-type: none"> • If a patient is transferred in from any emergency department (ED) or observation unit OUTSIDE of your hospital, select “No”. Measure 0496: Median Time from ED Arrival to ED Departure for Discharged ED Patients (Centers for Medicare and Medicaid Services)	
Description	Median time from emergency department arrival to time of departure from the emergency room for patients discharged from the emergency department
Numerator	Continuous Variable Statement: Time (in minutes) from ED arrival to ED departure for patients discharged from the emergency department.
Numerator Details	Continuous Variable Statement: Time (in minutes) from ED arrival to ED departure for patients discharged from the emergency department.
Denominator	Continuous Variable Statement: Time (in minutes) from ED arrival to ED departure for patients discharged from the emergency department.
Denominator Details	Any ED Patient from the facility's emergency department E/M Codes Emergency Department 99281 Emergency department visit, new or established patient 99282 Emergency department visit, new or established patient 99283 Emergency department visit, new or established patient 99284 Emergency department visit, new or established patient 99285 Emergency department visit, new or established patient 99291 Critical care, evaluation and management
Exclusions	Patients who expired in the emergency department
Exclusion details	Discharge Code Value 6: Expired
Risk Adjustment	No risk adjustment or risk stratification
Stratification	OP-18a Median Time from ED Arrival to ED Departure for Discharged ED Patients – Overall Rate (All patients seen in the ED and discharged) OP-18b Median Time from ED Arrival to ED Departure for Discharged ED Patients – Reporting Measure (non-psych and not transferred) OP-18c Median Time from ED Arrival to ED Departure for Discharged ED Patients – Psychiatric/Mental Health Patients(All patients seen in the ED who have a diagnosis consistent with mental disorders) OP-18d Median Time from ED Arrival to ED Departure for Discharged ED Patients – Transfer Patients (All patients seen in the ED who have been transferred to another acute care hospital.)

Table 1.0 E/M Codes for Emergency Department Visit

99281 Emergency department visit, new or established patient
99282 Emergency department visit, new or established patient
99283 Emergency department visit, new or established patient
99284 Emergency department visit, new or established patient
99285 Emergency department visit, new or established patient
99291 Critical care, evaluation and management

Observation Services

There was documentation the patient was placed into observation services in this facility's emergency department.

Measure 0497: Admit Decision Time to ED Departure Time for Admitted Patients (Centers for Medicare and Medicaid Services)	
Description	Median time from admit decision time to time of departure from the emergency department for emergency department patients admitted to inpatient status
Numerator	<p>Continuous Variable Statement: Time (in minutes) from admit decision time to time of departure from the emergency department for admitted patients.</p> <p>Included Populations: Any ED Patient from the facility's emergency department</p>
Numerator Details	<p>Continuous Variable Statement: Time (in minutes) from admit decision time to time of departure from the emergency department for admitted patients.</p> <p>Included Populations: Any ED Patient from the facility's emergency department</p> <p>Excluded Populations: Patients who are not an ED Patient</p> <p>Data Elements:</p> <ul style="list-style-type: none"> • Decision to Admit Date • Decision to Admit Time • ED Departure Date • ED Departure Time • ED Patient • ICD-9-CM Principal Diagnosis Code
Denominator	<p>Continuous Variable Statement: Time (in minutes) from admit decision time to time of departure from the emergency department for admitted patients.</p> <p>Included Populations: Any ED Patient from the facility's emergency department</p> <p>Excluded Populations: Patients who are not an ED Patient</p> <p>Data Elements:</p> <ul style="list-style-type: none"> • Decision to Admit Date • Decision to Admit Time • ED Departure Date • ED Departure Time • ED Patient • ICD-9-CM Principal Diagnosis Code
Denominator	Any ED Patient from the facility's emergency department.

Details

Data Element Name: ED Patient

Collected For: ED-1, ED-2

Definition: Patient received care in a dedicated emergency department of the facility.

Suggested Data Collection Question: Was the patient an ED patient at the facility?

Allowable Values:

Y (Yes) There is documentation the patient was an ED patient.

N (No) There is no documentation the patient was an ED patient, OR unable to determine from medical record documentation.

Notes for Abstraction:

- For the purposes of this data element an ED patient is defined as any patient receiving care or services in the Emergency Department.
- Patients seen in an Urgent Care, ER Fast Track, etc. are not considered an ED patient unless they received services in the emergency department at the facility (e.g., patient treated at an urgent care and transferred to the main campus ED is considered an ED patient, but a patient seen at the urgent care and transferred to the hospital as a direct admit would not be considered an ED patient).
- Patients presenting to the ED who do not receive care or services in the ED abstract as a "No" (e.g., patient is sent to hospital from physician office and presents to ED triage and is instructed to proceed straight to floor).
- Patients presenting to the ED for outpatient services such as lab work etc. will abstract as a "Yes".

ED:

- If a patient is transferred in from any emergency department (ED) or observation unit OUTSIDE of your hospital, select "No". This applies even if the emergency department or observation unit is part of your hospital's system (e.g., your hospital's free-standing or satellite emergency department), has a shared medical record or provider number, or is in close proximity. Select "No", even if the transferred patient is seen in this facility's ED.
- If the patient is transferred to your hospital from an outside hospital where he was an inpatient or outpatient, select "No". This applies even if the two hospitals are close in proximity, part of the same hospital system, have the same provider number, and/or there is one medical record. Select "No", even if the transferred patient is seen in this facility's ED.

Suggested Data Sources:

- Emergency department record
- Face sheet
- Registration form

Inclusion Guidelines for Abstraction:

None

	<p>Exclusion Guidelines for Abstraction:</p> <ul style="list-style-type: none"> • Urgent Care • Fast Track ED • Terms synonymous with Urgent Care
Exclusions	Patients who are not an ED Patient
Exclusion details	<p>All non-ED patients are excluded from this measure, with no other exclusions.</p> <p>Data Element Name: ED Patient</p> <p>Collected For: ED-1, ED-2</p> <p>Definition: Patient received care in a dedicated emergency department of the facility.</p> <p>Suggested Data Collection Question: Was the patient an ED patient at the facility?</p> <p>Allowable Values:</p> <p>Y (Yes) There is documentation the patient was an ED patient.</p> <p>N (No) There is no documentation the patient was an ED patient, OR unable to determine from medical record documentation.</p> <p>Notes for Abstraction:</p> <ul style="list-style-type: none"> • For the purposes of this data element an ED patient is defined as any patient receiving care or services in the Emergency Department. • Patients seen in an Urgent Care, ER Fast Track, etc. are not considered an ED patient unless they received services in the emergency department at the facility (e.g., patient treated at an urgent care and transferred to the main campus ED is considered an ED patient, but a patient seen at the urgent care and transferred to the hospital as a direct admit would not be considered an ED patient). • Patients presenting to the ED who do not receive care or services in the ED abstract as a “No” (e.g., patient is sent to hospital from physician office and presents to ED triage and is instructed to proceed straight to floor). • Patients presenting to the ED for outpatient services such as lab work etc. will abstract as a “Yes”. <p>ED:</p> <ul style="list-style-type: none"> • If a patient is transferred in from any emergency department (ED) or observation unit OUTSIDE of your hospital, select “No”. Measure 2456: Medication Reconciliation: Number of Unintentional Medication Discrepancies per Patient (Brigham and Women's Hospital)	
Description	<p>This measure assesses the actual quality of the medication reconciliation process by identifying errors in admission and discharge medication orders due to problems with the medication reconciliation process. The target population is any hospitalized adult patient. The time frame is the hospitalization period.</p> <p>At the time of admission, the admission orders are compared to the preadmission medication list (PAML) compiled by trained pharmacist (i.e., the gold standard) to look for discrepancies and identify which discrepancies were unintentional using brief medical record review. This process is repeated at the time of discharge where the discharge medication list is compared to the PAML and medications ordered during the hospitalization.</p>
Numerator	For each sampled inpatient in the denominator, the total number of unintentional medication discrepancies in admission orders plus the total number of unintentional medication discrepancies in discharge orders.
Numerator Details	<p>First, a "gold-standard" preadmission medication history is taken by a trained study pharmacist at each site, following a strict protocol and using all available sources of information, including subject and family/caregiver interviews, prescription pill bottles, outpatient electronic medical records, hard copies of forms/patient lists, previous hospital discharge orders, outpatient providers, and outpatient pharmacies (see Appendix A for complete protocol). The resulting preadmission medication list is then compared with the medical team's documented preadmission medication list and with all admission and discharge medication orders. Any discrepancies between the gold-standard history and medication orders are identified and reasons for these changes sought from the medical record. Pharmacists may also need to communicate directly with the medical team to clarify reasons for discrepancies, as needed. Medication discrepancies that are not clearly intentional are then recorded, along with the reason for the discrepancy:</p> <ol style="list-style-type: none"> 1. History error: the order is incorrect because the medical team's preadmission medication list is incorrect (e.g., the team did not know the patient was taking aspirin prior to admission, does not record it in the preadmission medication list, and therefore does not order it at admission) 2. Reconciliation error: the medical team's preadmission medication list is correct, but there is still an error in the orders. For example, the team knew the patient was taking aspirin prior to admission and documents it in the preadmission medication list. The team decides to hold the aspirin on admission for a clinical reason such as bleeding, but the team forgets to restart the aspirin at discharge. The admission discrepancy would be considered intentional (no error, not counted in the numerator), but the discharge discrepancy would be counted as a reconciliation error. <p>The type of error should also be recorded: omission, discrepancy in dose, route, frequency, or formulation, or an additional medication.</p> <p>Lastly, the time of the error should be recorded: admission vs. discharge.</p>
Denominator	The patient denominator includes a random sample of all potential adults admitted to the hospital. Our recommendation is that 25 patients are sampled per month, or approximately 1 patient per weekday.

	So, for example, if among those 25 patients, 75 unintentional discrepancies are identified, the measure outcome would be 3 discrepancies per patient for that hospital for that month.
Denominator Details	Patients are randomly selected each day from a list of admitted patients the day before. A target number of patients are selected(e.g. one patient per weekday) and these patients are interviewed by the pharmacist.
Exclusions	Patients that are discharged or expire before a gold standard medication list can be obtained.
Exclusion details	Please see exclusion listed above in S.10.
Risk Adjustment	No risk adjustment or risk stratification
Stratification	Stratification could be done by service if desired by NQF , for example: non-ICU medicine, non-ICU surgery, ICU, and other.
Numerator Time window	The time period is from the time of hospital admission to discharge.
Type	Outcome
Type of Score	Continuous variable, e.g. average
