NQF Prioritization Initiative

NQF's Strategic Direction

Learn more about NQF's Strategic Plan at

http://www.qualityforum.org/NQF Strategic Direction 2016-2019.aspx

What is the goal of the prioritization?

- Identify a list of the highest scoring priority measures.
- Identify prioritized sub-lists, sortable and filterable, by disease topics and for different stakeholder groups.
- Create a framework that organizes measures and measurement gaps into national priorities areas.
- Reduce the number of measures in use and encourage measure harmonization across the healthcare field by sharing prioritization scores with appropriate measure stakeholders.

NQF Prioritization Initiative

NQF Measure Prioritization Criteria

Prioritization Phase 1

Prioritization Phase 2

Outcome-focused (25%)

 Outcome measures and measures with strong link to improved outcomes and costs

Improvable (25%)

 Measures with demonstrated need for improvement and evidence-based strategies for doing so

Equity Focused

• Measures that are disparities sensitive

Meaningful to patients and caregivers (25%)

 Person-centered measures with meaningful and understandable results for patients and caregivers

Support systemic and integrated view of care (25%)

 Measures that reflect care that spans settings, providers, and time to ensure that care is improving within and across systems of care

Breakdown of the Criteria

Outcome-focused

• Measures are scored based on measure type: Process/Structural, Intermediate clinical outcome or process tightly linked to outcome, Outcome/CRU

Improvable

• Measures are scored based the percentage of committee members votes on the "Gap" Criteria during measure evaluation and maintenance review for "High," "Moderate," or "Low."

Meaningful to patients and caregivers

- Measures are scored based on if they are (1) a PRO and (2) if they are tagged as meaningful to patients.
- A meaningful change or health maintenance to the patients and caregivers encompasses measures that address the following areas: Symptoms, Functional status, Health related quality of life or well-being. Patient and caregiver experience of care (Including Financial Stress, Satisfaction, Care coordination/continuity of care Wait times, Patient and caregiver autonomy/empowerment) and Harm to the patient, patient safety, or avoidance of an adverse event

Support systemic and integrated view of care

- Measures are scored based on if (1) if they are a composite measure, (2) if they are applicable to multiple settings, (3) if they are condition agnostic, and (4) if they reflect a system outcome.
- A system outcome is defined as a measure that: Addresses issues of Readmission, Addresses issues of Care-coordination, Results from the care of multiple providers, or Addresses aspects to enhance healthcare value (including a cost or efficiency component)

Prioritization will be conducted within and across portfolios

NQF Prioritization Initiative: What's Next?

Activity	Date
Roll out at Spring 2018 Standing Committee Meetings	May-August 2018
Compile Phase I results from across Committees	August 2018
Measure Evaluation Annual Report Appendix	September 2018
Presentation/Update at NQF Annual Meeting	March 2019

Questions for Committee

- Do the initial scoring results yield the outcomes you might have expected?
 - Are the highest and lowest impact measures scoring correctly based on the rubric?
 - Do you have any feedback on the way the rubric is generating results or suggestions for updates in future iterations?
- Survey to be sent by email following the presentation.
