# Medicaid and CHIP (MAC) Scorecard Committee In-Person Meeting

*January 10-11, 2019*

# Welcome

# MAC Scorecard

## NQF Project Team

- Debjani Mukherjee, Senior Director
- Ashlie Wilbon, Senior Director
- Shaconna Gorham, Senior Project Manager
- Miranda Kuwahara, Project Manager
- Jordan Hirsch, Project Analyst

# Welcome

- **Restrooms**

- ▣ Exit main conference area, past elevators, on right.

- **Breaks**

- ▣ 10:40am – 15 minutes
- ▣ 12:45pm – Lunch provided by NQF

- **Laptops and cell phones**

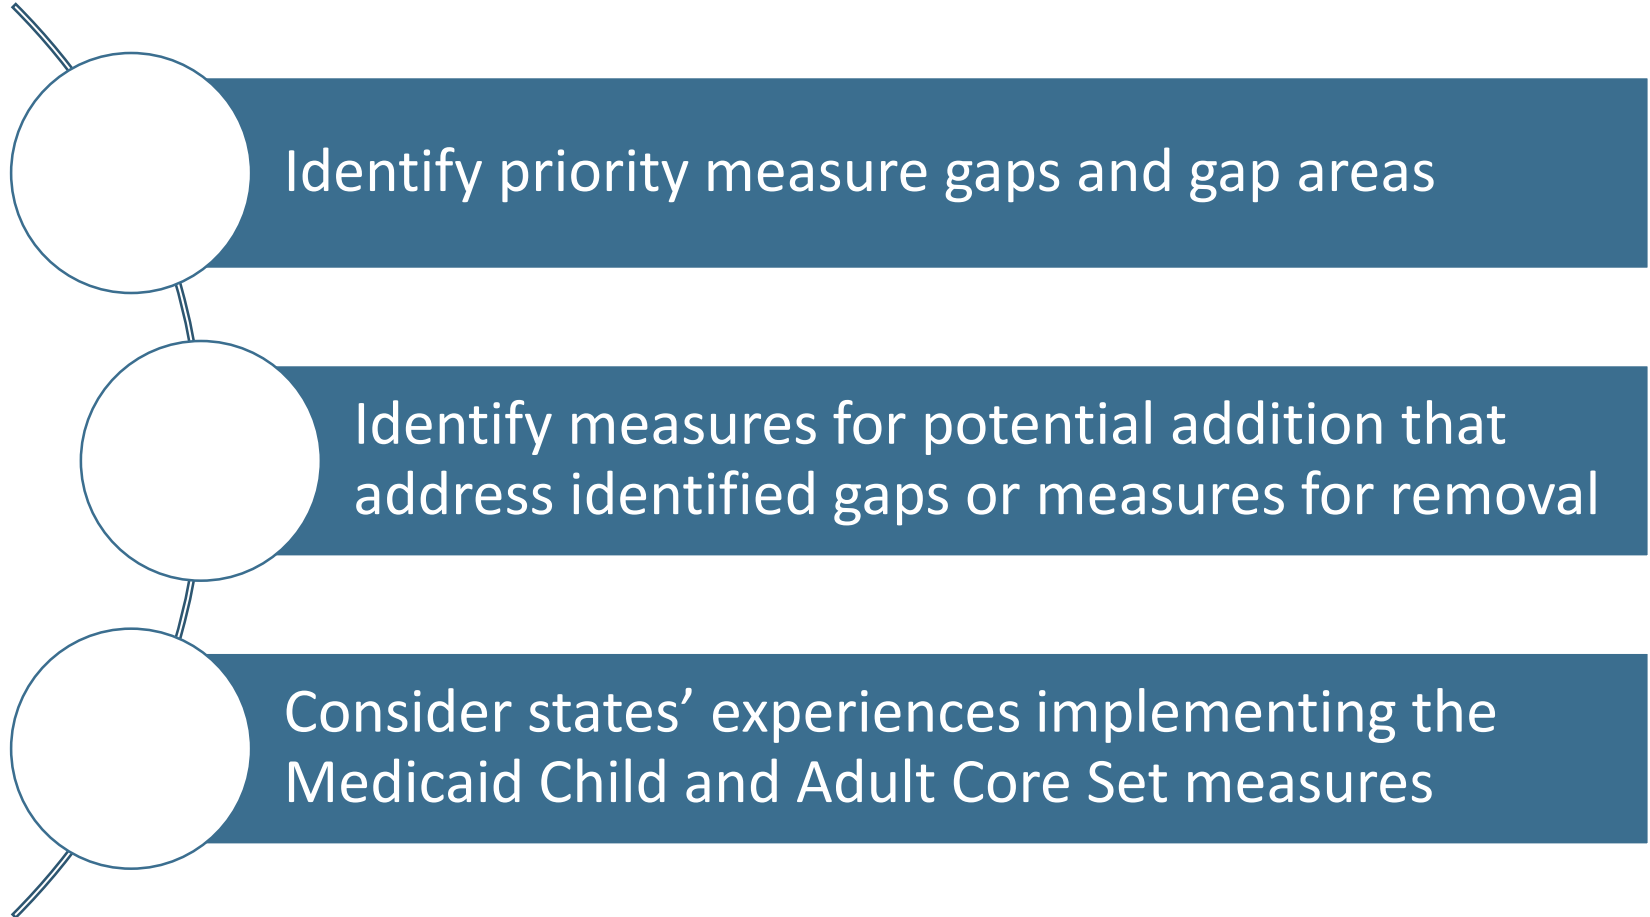

- ▣ Wi-Fi network
  - » User name: **guest**
  - » Password: **NQFguest**
- ▣ Please mute your cell phone during the meeting

- **Public comment period**

- ▣ Dedicated times for public comment
- ▣ Comment via chat box at any time and comments will be shared during dedicated times

Lindsay Cogan, PhD

# MAC Scorecard Committee Membership

---

## Federal Government Members (non-voting)

Agency	Agency Representative
Agency for Healthcare Research and Quality (AHRQ)	Kamila Mistry, PhD, MPH
Substance Abuse and Mental Health Services Administration	Laura Jacobus-Kantor, PhD
Centers for Medicare & Medicaid Services (CMS)	Marsha Smith, MD, MPH, FAAP
Health Resources and Services Administration	Suma Nair, MS, RD

# Measure Selection Criteria Overview

# Committee Overview and Key Points from Staff Review of Scorecard

# Charge of the MAC Scorecard Committee

The Scorecard Committee is charged with exploring the existing Child and Adult Core Set measures and recommending measures for removal from the Scorecard or recommending measures for addition to the Scorecard that can be used to support the MAC Scorecard's state health system performance pillar.

- *Potential measures for addition to the Scorecard will focus on addressing the use and usefulness of measure implementation and reporting.*

# MAC Scorecard 1.0

## Promote Effective Communication and Coordination of Care Domain

NQF 0576 Follow-Up After Hospitalization for Mental Illness

\*NQF 1517 Prenatal and Postpartum Care: Postpartum Care

## Make Care Safer by Reducing Harm Caused in the Delivery of Care Domain

Use of Multiple Concurrent Antipsychotics: Ages 1-17

## Promote Effective Prevention & Treatment of Chronic Diseases Domain

NQF 1392 Well-Child Visits: First 15 Months

NQF 1516 Well-Child Visits: Ages 3-6

Adolescent Well-Care Visits: Ages 12-21

NQF 1407 Immunizations for Adolescents: Age 13

Percentage of Eligibles Who Received Preventive Dental Services: Ages 1-20

NQF 2940 Use of Opioids at High Dosage in Persons Without Cancer

NQF 0004 Initiation & Engagement of Alcohol & Other Drug Dependence Treatment: Age 18 & Older

NQF 0018 Controlling High Blood Pressure: Ages 18-85

## Strengthen Engagement in Care Domain

Getting Care Quickly (CAHPS)

Getting Needed Care (CAHPS)

## Make Care Affordable Domain

NQF 0272 PQI 01: Diabetes Short-Term Complications Admission Rate

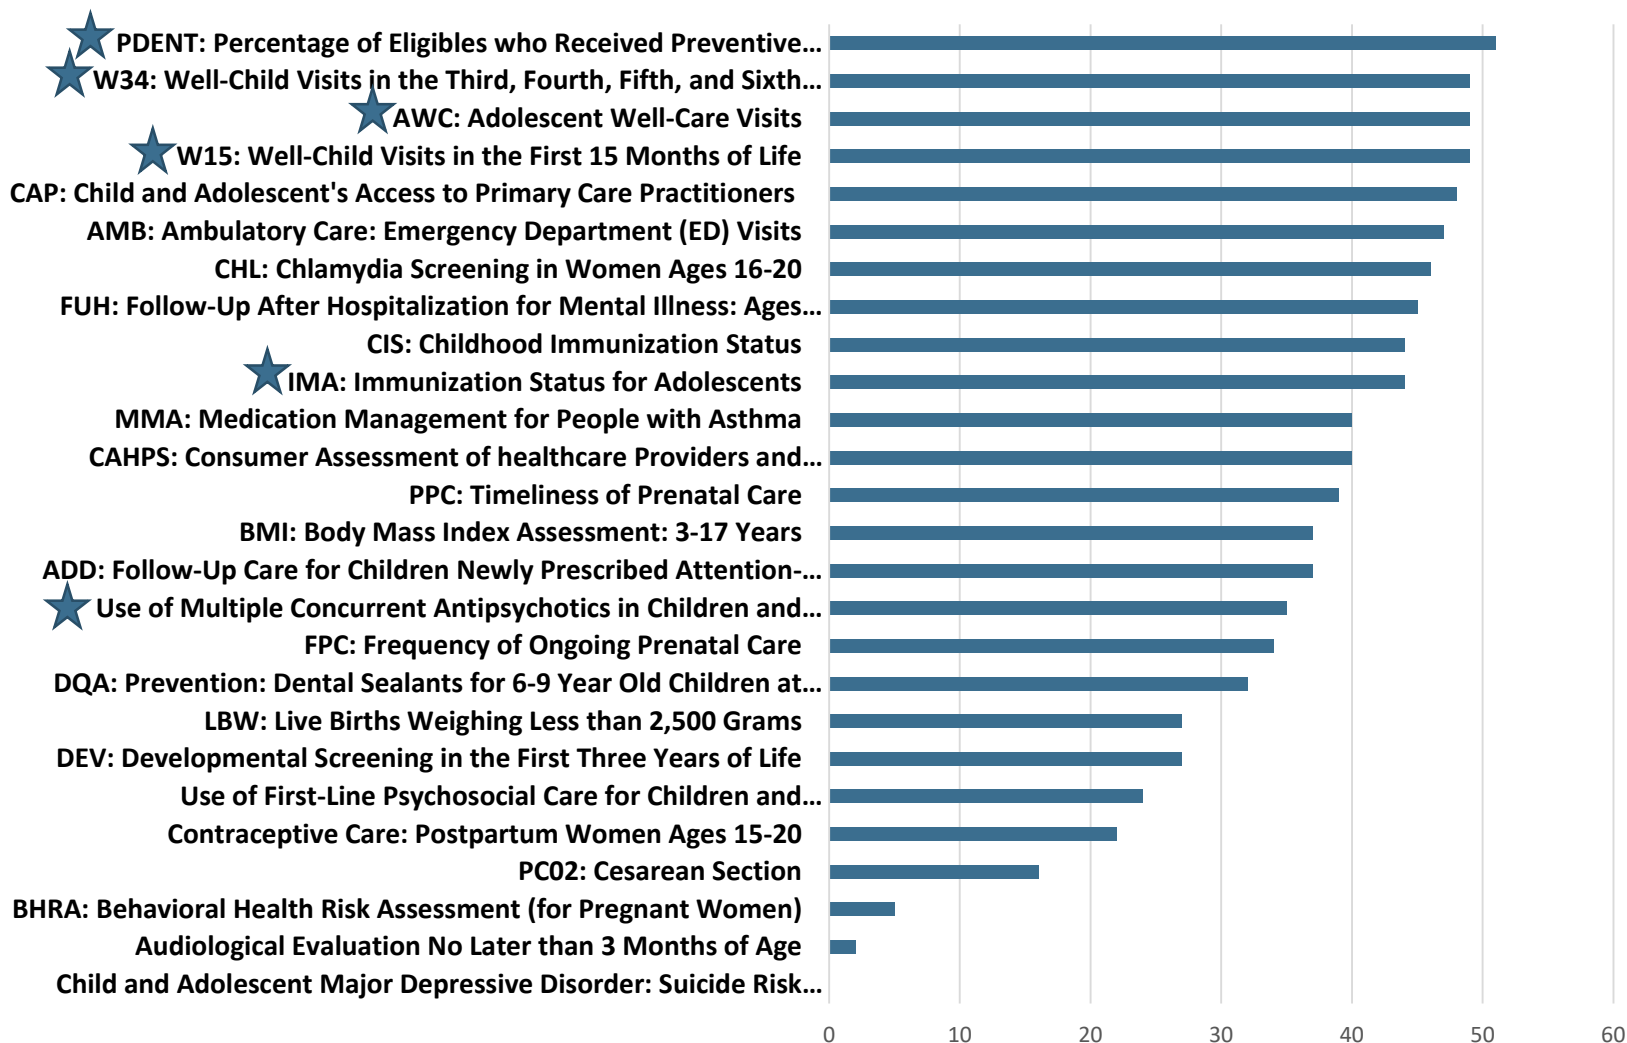

# MAC Scorecard Properties: Pillar One Measure Characteristics

MAC Scorecard Characteristics		# of Measures (n = 13)
Medicaid & CHIP Population	Medicaid and CHIP Child Beneficiaries	6
	Medicaid Adult Beneficiaries	7
NQF Endorsement Status	Endorsed	8
	Not Endorsed	5
Measure Type	Structure	0
	Process	8
	Outcome	2
	Patient Experience of Care	1
Data Collection Method*	Administrative Claims	10
	Electronic Clinical Data	6
	eMeasure Available	0
	Survey Data	1

\*Data not mutually exclusive

Note: Measure Type and Data Collection Method data unavailable for the following measures: Percentage of Eligibles Who Received Preventive Dental Services: Ages 1-20 and Adolescent Well-Care Visits: Ages 12-21

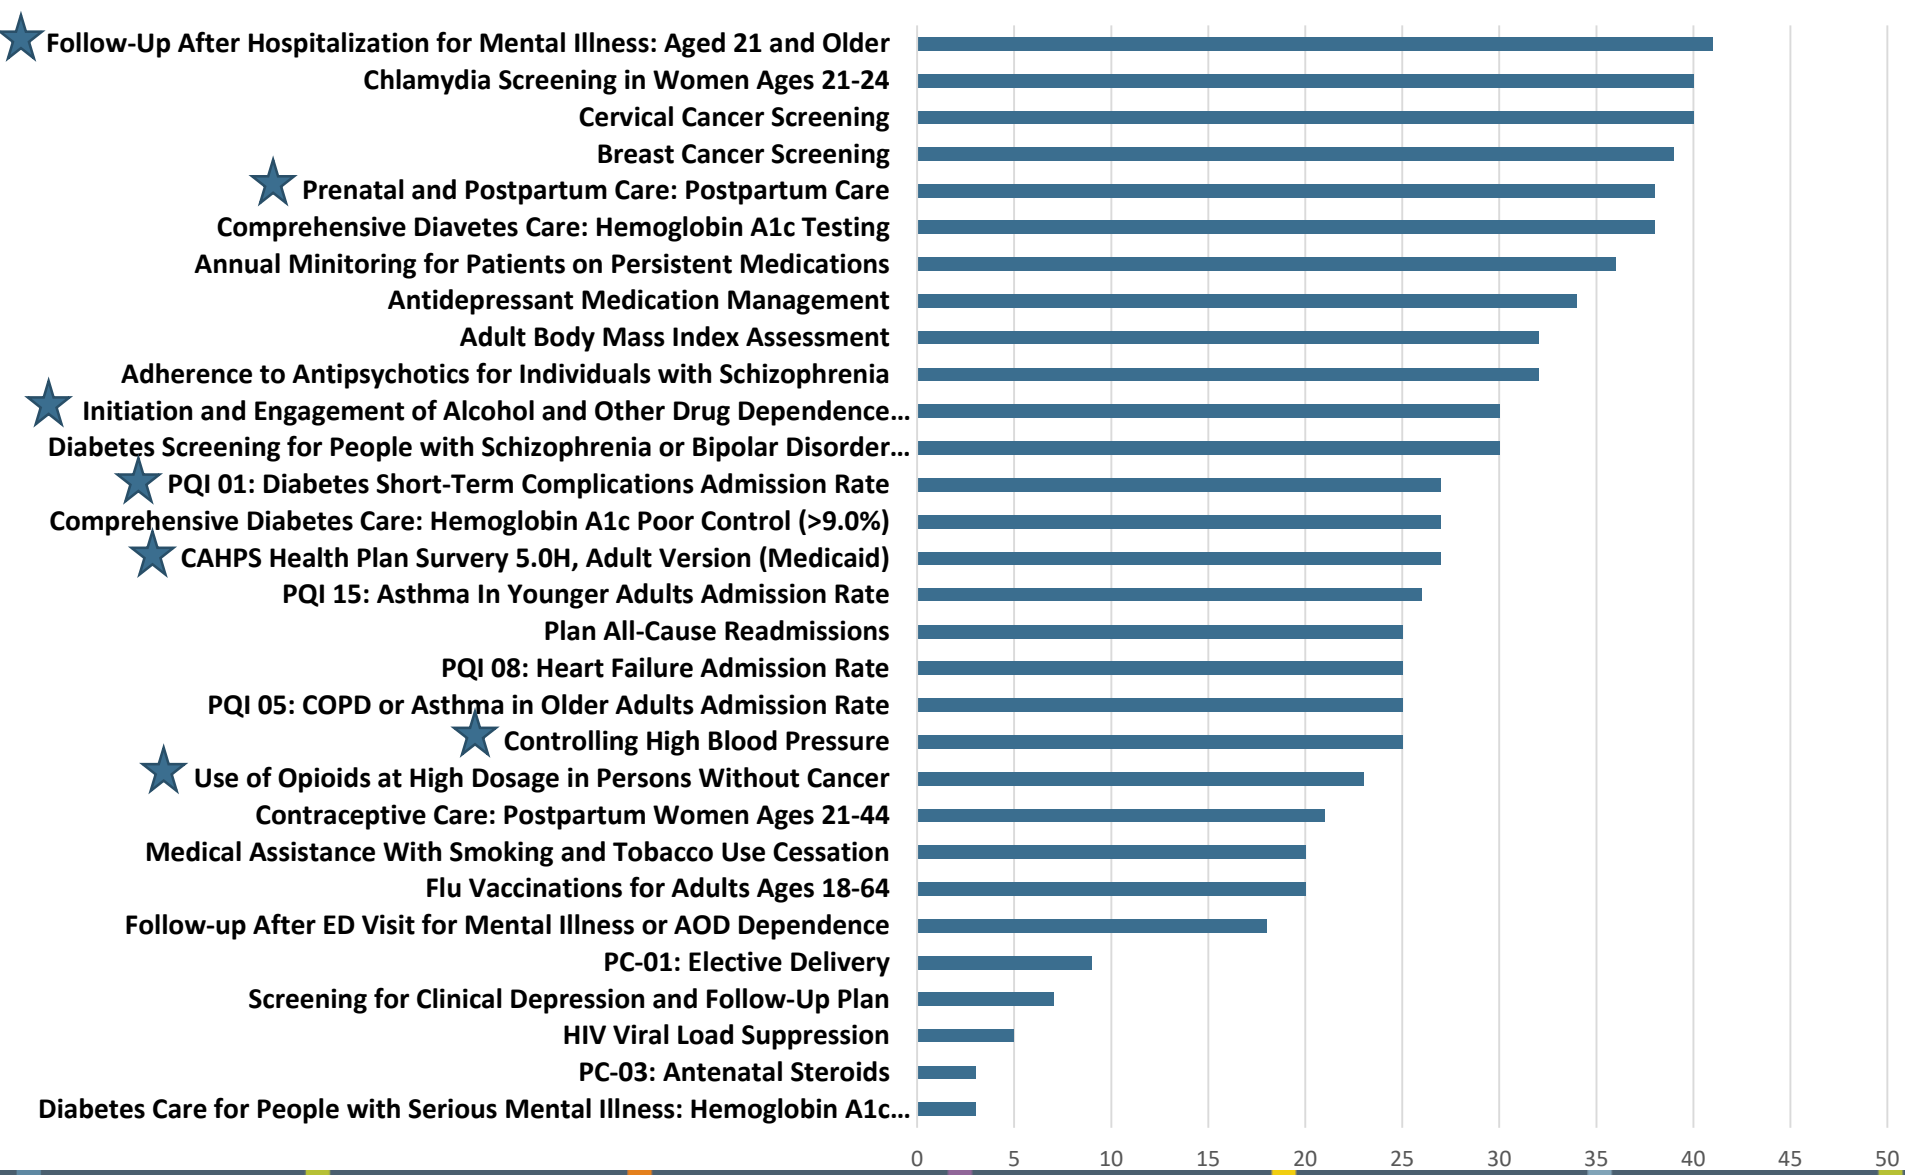

# Number of States Reporting the Medicaid Child Core Set Measures, FFY2017

★ Denotes inclusion in Scorecard

# Number of States Reporting the Medicaid Adult Core Set Measures, FFY2017

# Measure Review Process

- Staff compiled Adult and Child Core Set measures into an Excel spreadsheet, providing measure specification information
- Committee members submitted measure recommendations from the universe of measures included in the Excel spreadsheet
- Staff completed a preliminary analysis algorithm on each recommended measure
- Only measures recommended for review by Committee members will be considered
- Measure specifications and preliminary analysis results will be shared during the in-person meeting via an electronic discussion guide

# Committee Members' Measure Recommendations for Addition and Removal

- Members submitted 50 measure recommendations
  - ▣ *Number of unique measure recommendations for addition: 19*
    - » 2 measures are Scorecard 1.5 candidate measures and 11 measures have fewer than 25 reporting states, thus do not meet the criteria for consideration
  - ▣ *Number of unique measure recommendations for removal: 6*

# Measure Recommendations for Addition

NQF #	Title	Core Set
n/a	Adherence to Antipsychotic Medications for Individuals with Schizophrenia (SAA-AD)	Adult
0038*	Childhood Immunization Status (CIS-CH)	Child
0105	Antidepressant Medication Management (AMM-AD)	Adult
0139	Pediatric Central Line-Associated Bloodstream Infections (CLABSI-CH)	Child
1448*	Developmental Screening in the First Three Years of Life (DEV-CH)	Child
1768*	Plan All-Cause Readmissions (PCR-AD)	Adult

\* Recommended by more than one member

# Measure Recommendations for Removal

## Promote Effective Communication and Coordination of Care Domain

^NQF 1517 Prenatal and Postpartum Care: Postpartum Care

## Make Care Safer by Reducing Harm Caused in the Delivery of Care Domain

Use of Multiple Concurrent Antipsychotics: Ages 1-17

## Promote Effective Prevention & Treatment of Chronic Diseases Domain

NQF 1392 Well-Child Visits: First 15 Months

Adolescent Well-Care Visits: Ages 12-21

\*NQF 2940 Use of Opioids at High Dosage in Persons Without Cancer

NQF 0018 Controlling High Blood Pressure: Ages 18-85

\* Recommended by more than one member

^ No longer NQF endorsed

# Measure Recommendations for Addition – Not for Discussion

## Scorecard 1.5 Candidate Measures

NQF #	Title	Core Set
1932*	Diabetes Screening for People With Schizophrenia or Bipolar Disorder Who Are Using Antipsychotic Medications (SSD-AD)	Adult
2372*	Breast Cancer Screening (BCS-AD)	Adult

\* Recommended by more than one member

Note: The measures presented in the table will not be reviewed.

# Measure Recommendations for Addition – Not for Discussion - Measures That Do Not Reach 25 State Minimum Reporting Threshold

NQF #	Title	Core Set
2801	Use of First-Line Psychosocial Care for Children and Adolescents on Antipsychotics	Child
2607	Diabetes Care for People with Serious Mental Illness: Hemoglobin A1c (HbA1c) Poor Control (>9.0%) (HPCMI-AD)	Adult
0418/ 0418e*	Screening for Depression and Follow-Up Plan	Adult/Child
2605*	Follow-Up After Emergency Department Visit for Mental Illness or Alcohol and Other Drug Abuse or Dependence (FUA/FUM-AD)	Adult
0027*	Medical assistance with Smoking and Tobacco Use Cessation	Adult
0039*	Flu Vaccinations for Adults Ages 18 to 64	Adult
1800*	Asthma Medication Ratio: Ages 19 to 64	Adult

\* Recommended by more than one member

Note: The measures presented in the table will not be reviewed.

# Measure Recommendations for Addition – Not for Discussion - Measures That Do Not Reach 25 State Minimum Reporting Threshold

NQF #	Title	Core Set
2902	Contraceptive Care – Postpartum Women	Adult/Child
2903/ 2904*	Contraceptive Care – All Women	Adult/Child
1360	Audiological Evaluation no later than 3 months of age	Child
0471	PC-02 Cesarean Birth	Child

\* Recommended by more than one member

Note: The measures presented in the table will not be reviewed.

# Questions?

# Key Considerations from CMCS

# Questions?

# Break

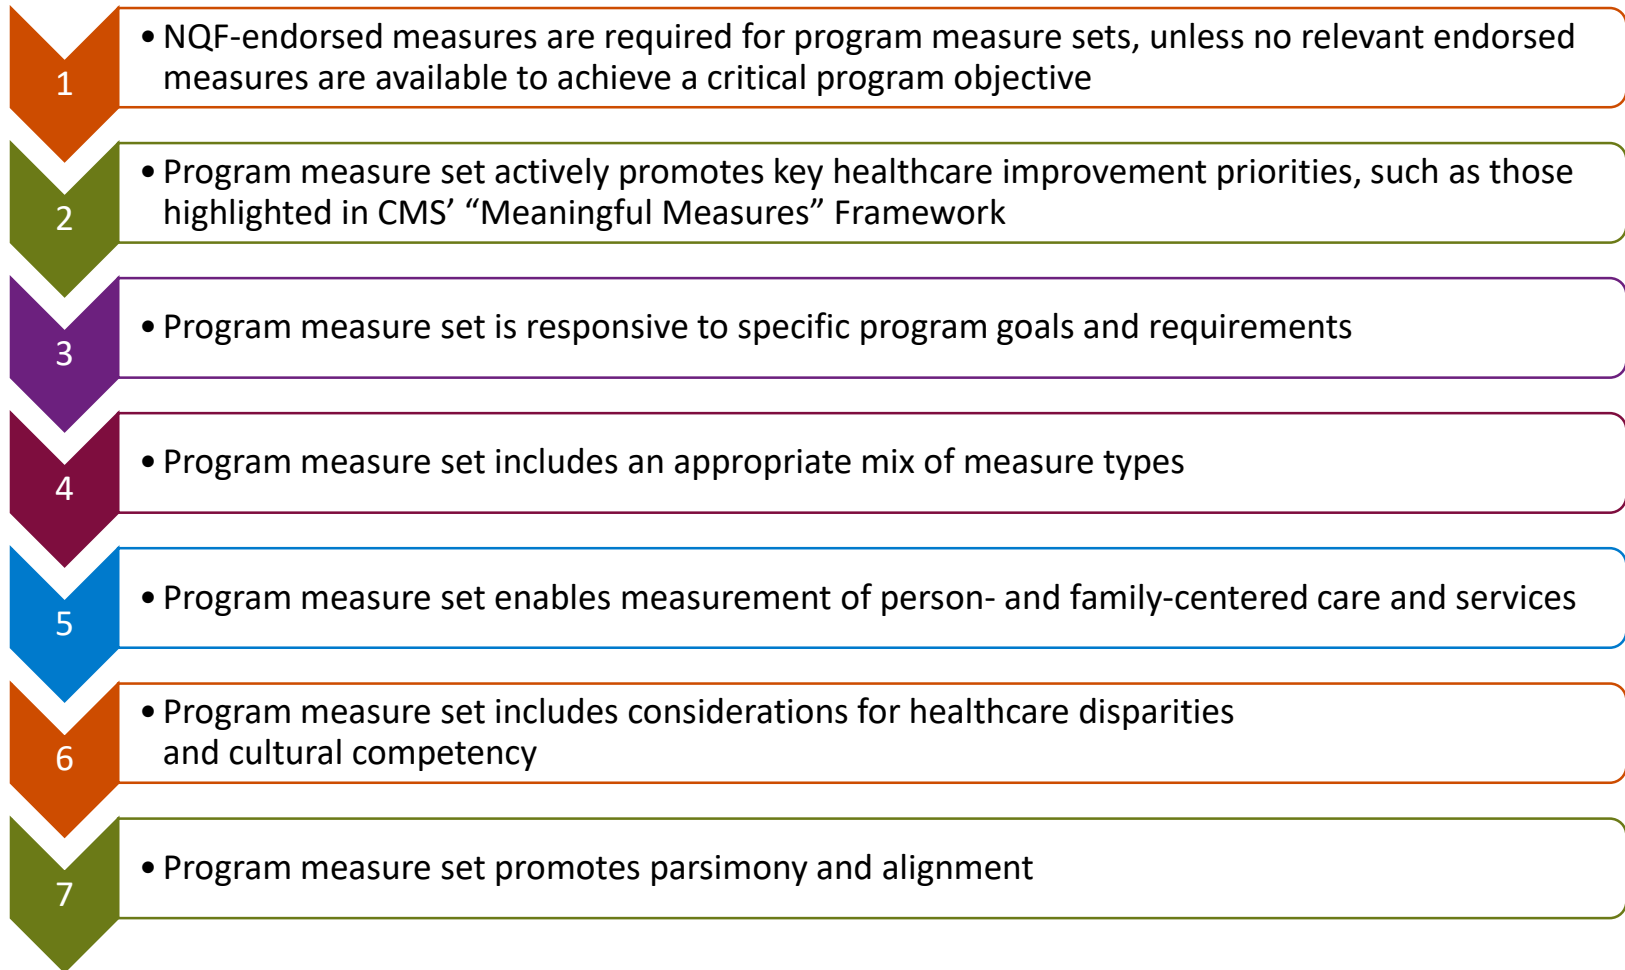

# Measure-Specific Recommendations on Strengthening the Scorecard

# Measure Review Process

- Staff compiled Adult and Child Core Set measures into an Excel spreadsheet, providing measure specification information
- Committee members submitted measure recommendations from the universe of measures included in the Excel spreadsheet
- Staff completed a preliminary analysis algorithm on each recommended measure
- Only measures recommended for review by Committee members will be considered.
- Measure specifications and preliminary analysis results will be shared during the in-person meeting via an electronic discussion guide

# Tools Used to Guide Measure Review

## MAP's Measure Selection Criteria (MSC)

# MAP Preliminary Analysis Algorithm

- 1) The measure addresses a critical quality objective not adequately addressed by the measures in the program set.
- 2) The measure is evidence-based and is either strongly linked to outcomes or an outcome measure.
- 3) The measure addresses a quality challenge.
- 4) The measure contributes to efficient use of measurement resources and/or supports alignment of measurement across programs.
- 5) The measure can be feasibly reported.
- 6) The measure is applicable to and appropriately specified for the program's intended care setting(s), level(s) of analysis, and population(s).
- 7) If a measure is in current use, no negative unintended issues to the patient have been identified.
- 8) If a measure is in current use, no implementation challenges outweighing the benefit of the measure have been identified.

# Review of Voting Process

## Voting on Measures

- Committee members who recommended measures for discussion were assigned as lead discussants
  - ▣ *Lead discussants will introduce the measure, highlighting specifications and its value to the Scorecard*
  - ▣ *Lead discussants will liaise with measure developers to ensure availability during the meeting*
- Ensuing discussions will include all Committee members
- Public comments will be solicited after Committee discussions
- After discussion of each measure and public comments, the Committee will vote on the measure

# Measure by Measure Review: Measure Recommendations for Removal from the Scorecard

# State Health System Performance Pillar 1

- Measure removals will be recommended from the measures included in pillar one
- Measure removal recommendations represent measures in three of the six domains
  - ▣ **Promote Effective Communication and Coordination of Care Domain** - Effective communication and coordination of care between beneficiaries, their families, and providers can prevent harm and promote improved health outcomes.
  - ▣ **Make Care Safer by Reducing Harm Caused in the Delivery of Care Domain** - Preventing harm caused in the delivery of care makes care safer for beneficiaries.
  - ▣ **Promote Effective Prevention & Treatment of Chronic Diseases Domain** - Promoting prevention and treatment of chronic diseases by encouraging activities such as regular screening and immunization helps beneficiaries lead healthier lives and reduces medical costs.

# Potential Reasons for Removal from Scorecard

- Consistently high levels of performance (e.g., >95%), indicating little room for additional improvement
- Multiple years of very low numbers of states reporting, indicating low feasibility or low priority of the topic
- Change in clinical evidence has made the measure obsolete
- Measure does not provide actionable information for state Medicaid program and/or its network of plans/providers
- Superior measure on the same topic has become available

# Recommendations for Removal from the Scorecard

NQF #	Measure Name	Measure Steward	Scorecard Domain
^1517	Prenatal and Postpartum Care: Postpartum Care	National Committee for Quality Assurance	Promote Effective Communication and Coordination of Care
N/A	Use of Multiple Concurrent Antipsychotics: Ages 1-17	National Committee for Quality Assurance	Make Care Safer by Reducing Harm Caused in the Delivery of Care
1392	Well-Child Visits: First 15 Months	National Committee for Quality Assurance	Promote Effective Prevention & Treatment of Chronic Diseases
N/A	Adolescent Well-Care Visits: Ages 12-21	National Committee for Quality Assurance	Promote Effective Prevention & Treatment of Chronic Diseases
2940	Use of Opioids at High Dosage in Persons Without Cancer	Pharmacy Quality Alliance	Promote Effective Prevention & Treatment of Chronic Diseases
0018	Controlling High Blood Pressure: Ages 18-85	National Committee for Quality Assurance	Promote Effective Prevention & Treatment of Chronic Diseases

# Opportunity for Public Comment & Break

# Review of the Voting Process

# Decision Categories

- Committee must reach a decision about every measure discussed
  - ▣ Each decision should be accompanied by one or more statements of rationale that explains why each decision was reached
- Decision categories include:
  - » Support
  - » Support with conditions
  - » Do not support
- Tallying the votes:
  - ▣ *Quorum - 66% of Committee required to be present for voting*
  - ▣ *≥60% of votes denote the result of voting*

# Voting Decision Categories

## SUPPORT

- Ready for immediate use
- Relevant to all stages of life
- Outcome measures

## CONDITIONAL SUPPORT

- Pending endorsement from NQF
- Pending CMS confirmation of feasibility

## DO NOT SUPPORT

- Measure and/or measure focus inappropriate or a poor fit for the Scorecard
- Duplication of efforts
- Resource constraints
- State Medicaid agencies will need to tweak and/or vary the level of analysis to increase measure adoption and implementation

# Committee Votes to Recommend Each Measure for Removal

- Vote to support or conditionally support removal of:
  - ▣ ^NQF 1517 *Prenatal and Postpartum Care: Postpartum Care*
  - ▣ N/A Use of Multiple Concurrent Antipsychotics in Children and Adolescents
  - ▣ NQF 1392 Well-Child Visits: First 15 Months
  - ▣ *Adolescent Well-Care Visits: Ages 12-21*
  - ▣ \*NQF 2940 Use of Opioids at High Dosage in Persons Without Cancer
  - ▣ NQF 0018 Controlling High Blood Pressure: Ages 18-85

# Lunch

# Measure by Measure Review: Potential Gap-Filling Measures for Addition to the Scorecard

# Measure Review for Potential Addition to the Scorecard

- Recommendations are guided by the Measure Selection Criteria, feedback from state implementers and Medicaid population specific gap areas not addressed in Scorecard 1.0
- A Medicaid specific algorithm and preliminary analysis was used as a standardized way to organize discussion on potential measure recommendations
- Committee members submitted measure recommendations for strengthening the Scorecard

# Measures for Potential Addition to the Scorecard

- All measures recommended to CMS will at a minimum:
  - ▣ *Satisfy the State Health System Performance pillar and domains*
  - ▣ *Be publicly reported (reported by 25 or more states)*
  - ▣ *Fill a gap area in Scorecard 1.0*

# State Health System Performance Pillar 1

- Measure additions will be recommended for inclusion in pillar one
- Measure recommendations represent measures in three of the six domains
  - ▣ **Make Care Safer by Reducing Harm Caused in the Delivery of Care Domain** - Preventing harm caused in the delivery of care makes care safer for beneficiaries.
  - ▣ **Promote Effective Prevention & Treatment of Chronic Diseases Domain** - Promoting prevention and treatment of chronic diseases by encouraging activities such as regular screening and immunization helps beneficiaries lead healthier lives and reduces medical costs.
  - ▣ **Make Care Affordable Domain** - Making care affordable by optimizing resource use helps Medicaid and CHIP beneficiaries access the care they need and may lead to better health outcomes.

# Recommendations for Addition to the Scorecard

NQF #	Measure Name	Measure Steward	Domain
N/A	Adherence to Antipsychotic Medications for Individuals with Schizophrenia (SAA-AD)	Centers for Medicare and Medicaid Services	Make Care Safer by Reducing Harm Caused in the Delivery of Care
0105	Antidepressant Medication Management (AMM-AD)	National Committee for Quality Assurance	Make Care Safer by Reducing Harm Caused in the Delivery of Care
0139	Pediatric Central Line Associated Bloodstream Infections (CLABSI)	Centers for Disease Control and Prevention	Make Care Safer by Reducing Harm Caused in the Delivery of Care

# Ranking of Measure Recommendations

# Ranking Measures with Support for Addition

- Committee members will prioritize measures selected for addition (day one). Priority will indicate the order in which the Committee recommends CMS add the measures to the set.

# Opportunity for Public Comment & Break

# MAC Scorecard Measures to Drive Change in Health System Performance

# Discussion Questions

- From the state Medicaid perspective, what health system performance changes do you expect from the Scorecard?
- What aspects of health system performance can be impacted with the Scorecard?
- How can existing Scorecard measures be tweaked to increase impact?
- What state level factors are important for maximizing Scorecard impact on health system performance?

# Future Directions for the MAC Scorecard

# Discussion Questions

- From the state Medicaid perspective, what do you see the Scorecard evolving in the future?
- How can the evolution be maximized?
- What processes are necessary to foster and facilitate maximize Scorecard evolution?
- How can state's proactively participate in this evolution and maximize Scorecard impact on health system performance?

# Opportunity for Public Comment

# Next Steps

# Important Dates

- **January 16:** Post-meeting web meeting
- **February 25 to March 27:** Draft report posted for public comment
- **April 25:** Post Comment web meeting
