

## [PFCC] Standing Committee Proposed Roster with Public Comments and NQF Responses

### PFCC Standing Committee Proposed Roster –Public Comments

<b>Name of Commenter:</b>  David Gifford Senior Vice President Quality and Regularity Affairs	<b>Organization Affiliated:</b>  American Health Care Association	<b>Comment:</b> <i>The American Health Care Association (AHCA) and National Center for Assisted Living (NCAL) is the nation's leading long term care organization representing more than 12,000 non-profit and proprietary nursing centers, assisted living, developmentally disabled, and sub-acute care providers. Our members deliver the professional, compassionate, quality long term and post-acute care that more than 1.5 million of America's seniors and persons with disabilities rely on each day. AHCA is pleased to have the opportunity to comment on the proposed roster for Person and Family Centered Care Phase 3. In reviewing the roster, we have identified a gap in the experience of proposed committee members in the long term care sector. As measures specific to this sector have been submitted for review during this phase, we encourage NQF to seek out individuals with expertise in this sector and add them to the roster.</i>	Comment Received: 4/15/16
		<b>Response:</b> Thank you for your comment on the PFCC roster. The Committee has multiple members with post-acute care setting experience, including nursing home expertise. Given the wide range of care settings that are covered in the PFCC project, we are unable to seat a representative from every care setting. NQF has carefully reviewed both the measures in this phase and the Committee members and believes we have the right expertise to review post-acute care measures.	Response Sent: 4/22/16
<b>Name of Commenter:</b>  Lauren Agoratus	<b>Organization Affiliated:</b>  Family Voices NJ	<b>Comment:</b> The roster looks very impressive. I was particularly pleased to see the inclusion of a representative from Partners for Patients. The only other suggestion would be perhaps to include a representative from the Patient-Centered Primary Care Collaborative. I do not have a specific nomination, just know of their good work. 		<b>Response:</b> Thank you for your comment on the PFCC roster. Unfortunately, due to space limitations on the Committee, we are unable to seat someone from every organization that we would like to, but we do have Committee members with both primary care and patient-centeredness expertise.
