Trauma Outcomes Web Meeting #3

John Bernot, MD
Andrew Lyzenga, MPP
Jean-Luc Tilly
Christy Skipper, MS

November 5, 2018

WELCOME

TO NATIONAL QUALITY FORUM

Over 420 Members Strong

Agenda

- Welcome and Review of Meeting Objectives

- Trauma Domains

- Committee Discussion

- Public Comment

- Next Steps

Project Staff

- John Bernot, MD, Vice President

- Andrew Lyzenga, MPP, Senior Director

- Jean-Luc Tilly, Senior Project Manager

- Christy Skipper, MS, Project Manager

- Vaishnavi Kosuri, MPH, Project Analyst

Committee Members

- Carol Immermann, BSN, RN (co-chair)
- Avery Nathens, MD, MPH, PhD, FACS (co-chair)
- Robert Bass, MD, FACEP
- Derek Bergsten, Paramedic, CFO, CEMSO, CTO
- Bryan Collier, DO
- Joseph Cuschieri, MD
- James Eubanks, MD, FACS
- Alexander Garza, MD, MPH
- Michael Gonzalez, MD, FACEP, FAAEM
- Adil Haider, MD, MPH, FACS
- Kurt Hoppe, MD
- Elliott Haut, MD, PhD, FACS

- David Livingston, MD
- Barry Markman, MD, MBA, FACS
- Linda Melillo, MA, MS, CPHRM, CPXP
- Anna Miller, MD, FACS
- Sage Myers, MD, MSCE
- Craig Newgard, MD, MPH
- Jack Sava, MD
- Andrew Schrag, MBA, MA, LPCS
- David Seidenwurm, MD, FACR
- Theresa Snavely, MSN, RN
- Peter Thomas, JD
- Garth Utter, MD, MSc
- Gregory Hawryluk, MD, PhD, FRCSC

Synthesized Trauma Domains

Table 1. Synthesized Domains and Example Subdomains

Domain	Subdomain
Access to trauma services	• Capacity of services • Availability of services • Timeliness of services
Trauma health outcomes	• Acute care • Post-acute care • Longitudinal care • Population, person, caregiver
Cost of trauma care	• Patient cost • System level cost • Population level cost
Prevention of trauma	*Outside of scope of this project. Serves as a placeholder for future projects.
Equity of trauma care	* Independent domain or included as a component of the above domains.

Access to Trauma Services

- Dominant theme in all breakout groups

- Example subdomains include:
    - *Capacity of Services*
    - *Availability of Services*
    - *Timeliness of Services*

Trauma Health Outcomes

- Domain is consistent with current quality metrics and associated with continuum of care

- Example subdomains include:
  - *Acute care*
  - *Post-acute care*
  - *Longitudinal Care*
  - *Population*

Cost of Trauma Care

- Domain allows a connection between health outcome and cost to determine value of care delivered

- Example subdomains include cost at:
  - *Patient level*
  - *System level*
  - *Population level*

Prevention

- Important to include but outside the scope of this project

- Project begins with point of injury

Equity

- Committee support for equity in the framework

- Social Risk Adjustment and Stratification represented in other domains

- Should equity be represented as a stand-alone domain?

Discussion Questions

1. Do you agree with the general direction of the above domains? What else should be added? What should be removed?

2. **For the purposes of this measurement framework**, is it ok to state that trauma begins at the point of injury (while acknowledging the importance of prevention)?

3. Should there be a standalone "Equity" domain or should it be seen as a pervasive theme amongst the other domains? If it is a standalone domain, what are some example subdomains, measures, or measure concepts that would belong in that domain?

Committee Discussion

Opportunity for Public Comment

Next Steps

- Web Meeting 4
  - *November 29, 2018 at 2:00-4:00pm ET*
