Welcome to the Alignment Tool

The National Quality Forum's (NQF) **Community Tool to Align Measurement (Alignment Tool)**¹ was developed in collaboration with 16 community alliances in the Robert Wood Johnson Foundation's *Aligning Forces for Quality (AF4Q)* program. It provides insight for those interested in starting or expanding measurement and public reporting in ways that align with others at the local, state, and national levels. The Alignment Tool includes NQF-endorsed[®] measures in use by the AF4Q Alliances, notations of which measures are also in certain national programs, and lessons from three communities about their use of specific measures. This tool was designed to support and motivate aligned measurement and public reporting, consistent with the National Quality Strategy, while recognizing state and community leaders' need for flexibility to address regional needs and interests.

The Alignment Tool and related information can be found on NQF's web site at:

www.qualityforum.org/AlignmentTool

Alignment Tool Components

The Alignment Tool includes two components:

Part I: Measure Spreadsheet

A Microsoft Excel² spreadsheet containing 171 NQF-endorsed measures in use in at least one of the 16 AF4Q Alliances as of February 2012.

Part II: Measure Use Experience Document

A document describing the measurement and public reporting experience of three AF4Q Alliances – Cincinnati, Detroit, and Maine – including specific information about many of the measures in use in each community.

This User Guide describes how to use the Alignment Tool to support measurement expansion, alignment, and collaboration needs.

¹ Support for the NQF Alignment Tool is provided by the Robert Wood Johnson Foundation (www.rwjf.org).

² This component is a Microsoft Excel 2010 file. If you use earlier versions of Microsoft Office, install the compatibility service pack to use the Tool:

<http://www.microsoft.com/download/en/details.aspx?displaylang=en&id=3>.

Alignment Tool Content

There are five tabs in the spreadsheet (Figure 1).

| | | | | | | | | | | | | |
|----|---------------------------|------------------|--|--|---|--|--|--|--|---|--|---|
| 12 | Breast Cancer Screening | Clinician Office | | | 1 | | | | | 1 | | 1 |
| 13 | Cervical Cancer Screening | Clinician Office | | | 1 | | | | | 1 | | 1 |
| | Chlamydia Screening in | | | | 1 | | | | | | | |

Navigation: |< < > >| **ALL** / AF4Q Alliances / National Programs & Initiatives / Your Measures in Use Template / Charts

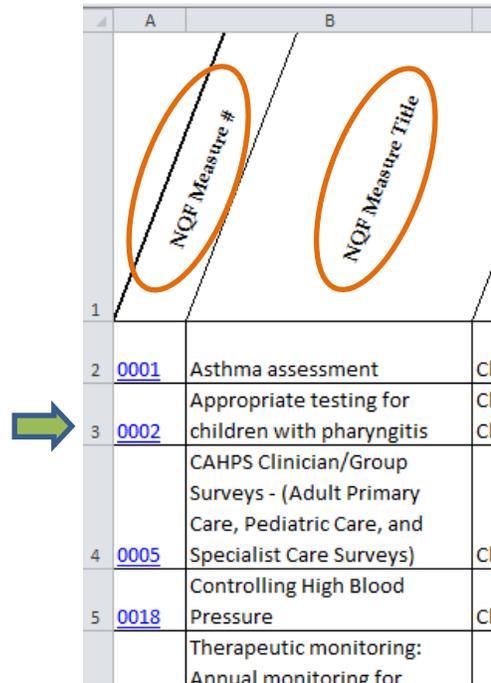

Figure 1: Alignment Tool Tabs

The content of each tab is explained in the table below, followed by a detailed explanation of the contents found within the ALL tab.

| Tab Name | Content |
|--|---|
| ALL | All of the information in the Alignment Tool, including: <ul style="list-style-type: none"> - NQF Measure Number, Measure Title, and Care Setting - National Quality Strategy (NQS) Priorities - AF4Q Alliances’ NQF-endorsed Measures in Use - Which of the NQF-endorsed Measures in Use are Included in National Programs and Initiatives |
| AF4Q Alliances | Information from the ALL tab limited to: <ul style="list-style-type: none"> - NQF Measure Number, Measure Title, and Care Setting - NQS Priorities - AF4Q Alliances’ NQF-endorsed Measures in Use |
| National Programs & Initiatives | Information from the ALL tab limited to: <ul style="list-style-type: none"> - NQF Measure Number, Measure Title, and Care Setting - NQS Priorities - Which of the NQF-endorsed Measures in Use are Included in National Programs and Initiatives |
| Your Measures in Use Template | Information from the ALL tab limited to: <ul style="list-style-type: none"> - NQF Measure Number, Measure Title, and Care Setting - NQS Priorities - Total Number of AF4Q Alliances Using a Given NQF-endorsed Measure - Total Number of National Programs and Initiatives that Include a Given NQF-endorsed Measure |
| Charts (followed by a tab including Chart Data) | Reference charts created from the ALL tab including: <ul style="list-style-type: none"> - How the NQF-Endorsed Measures in Use by the AF4Q Alliances Map to the NQS Priorities - Frequency of Use of these NQF-endorsed Measures Across All AF4Q Alliances |

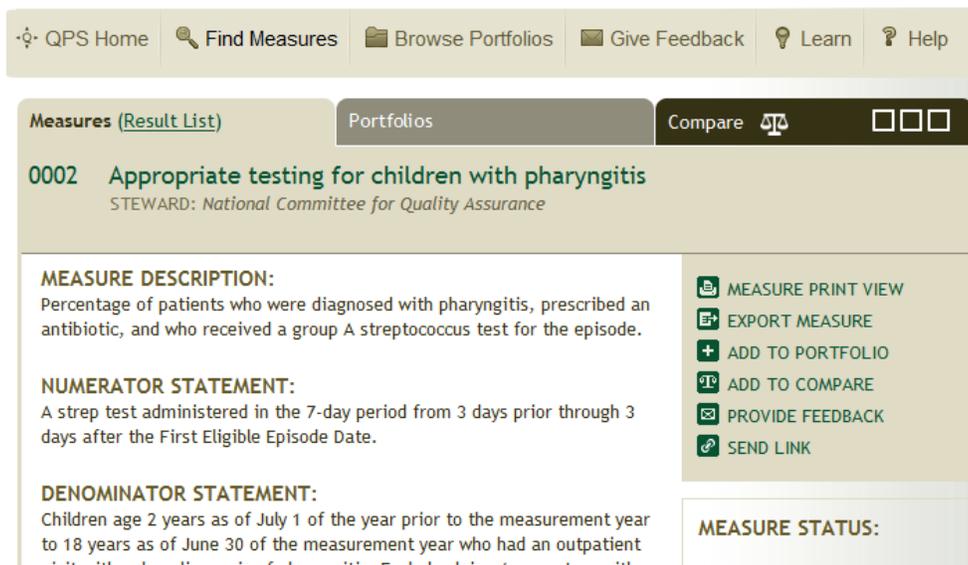

NQF Measure Number and NQF Measure Title

The first and second columns list the NQF measure number and measure title (Figure 2). Each NQF measure number is hyperlinked to the [Quality Positioning System \(QPS\)](#) – NQF’s online measure search tool – where additional information on the measure can be found (Figure 3). QPS allows you to view details about NQF-endorsed measures, see lists of endorsed measures (‘portfolios’) that are in use by or of interest to others, and compare measures or portfolios for deeper insight. QPS can be accessed at www.qualityforum.org/QPS.

0002 Appropriate testing for children with pharyngitis

STEWARDS: National Committee for Quality Assurance

MEASURE DESCRIPTION:
Percentage of patients who were diagnosed with pharyngitis, prescribed an antibiotic, and who received a group A streptococcus test for the episode.

NUMERATOR STATEMENT:
A strep test administered in the 7-day period from 3 days prior through 3 days after the First Eligible Episode Date.

DENOMINATOR STATEMENT:
Children age 2 years as of July 1 of the year prior to the measurement year to 18 years as of June 30 of the measurement year who had an outpatient visit with only a diagnosis of pharyngitis. Exclude claims/encounters with

| | Controlling High Blood | | | | | | | | | | |

Figure 5: Measures Mapped to National Quality Strategy Priorities

Measure Use in the AF4Q Alliances

The 16 columns following the NQS priority areas list the NQF-endorsed measures in use by each of the 16 AF4Q Alliances. The “1” under each alliance indicates which NQF-endorsed measure is in use by that community (Figure 6). The blue column provides the total number of alliances using each measure.

Each AF4Q Alliance provided to NQF the measures they have in use and worked with NQF to determine which of those measures are NQF-endorsed. Alliances took different approaches in deciding which measures to report as “in use”, sometimes including measures used in collaboration with other organizations in their region. The alliances use more measures than listed here, including measures that are not NQF-endorsed. The information in the Tool is current as of February 2012.

Figure 6: Each AF4Q Alliance’s NQF-endorsed Measures in Use

The name of each AF4Q Alliance is hyperlinked to that alliance’s published list, or ‘portfolio’, of NQF-endorsed measures in QPS (see arrow in Figure 6). Clicking on the hyperlink will take you to the QPS portfolio page for that alliance and allow you to view the list of NQF-endorsed measures they use, compare measures and portfolios, and save your own copy of a portfolio, among other actions (Figure 7).

While the information in the Tool is a ‘snapshot in time’, the portfolios published in QPS provide the most up-to-date information for the NQF-endorsed measures in use in the 16 AF4Q Alliances.

Figure 7: Example of an AF4Q Alliance’s Published QPS Portfolio

Measure Use Experience from the Cincinnati, Detroit, and Maine AF4Q Alliances

The AF4Q Alliances in Cincinnati, Detroit, and Maine worked closely with NQF to share their experiences in using specific NQF-endorsed measures (see grey columns in Figure 6 on previous page). When measure-specific experience insights have been provided by one of these three communities, the “1” will hyperlink (Figure 8) to Part II of the Alignment Tool – a PDF document that presents this measure-specific use experience as well as a ‘measurement story’ for each of the three alliances. Those stories include an in-depth account of these alliances’ measure selection processes, how they share and use measure results, and impacts observed thus far.

Ideas for Using the Alignment Tool

There are many potential uses for the **NQF Community Tool to Align Measurement (Alignment Tool)** that can help meet your needs. Several ideas are listed below, followed by instructions that will help you implement the ideas:

IDEA 1: Examine the measures you use to find opportunities to align with others

Complete the Your Measures in Use Template tab

List the NQF-endorsed measures you use in the *Your Measures in Use Template*, drawing from measures already listed in the Tool or NQF's online measure search tool, the [Quality Positioning System](#). Then search, sort, and compare your measures in use with others to help guide your decision-making.

IDEA 2: Ensure you are well-positioned for public- and private-sector payment incentives

Sort and filter the Tool's content to see where your measurement is aligned with one or more of the National Quality Strategy priorities that drive national reporting requirements and performance-based payment. Learn from others who are already measuring in key priority areas to help you begin to address gaps in your measurement.

IDEA 3: Reduce measurement overload and burden by aligning with 'high-value' measures

Sort and filter the Tool's content based on certain national programs or initiatives, then compare the measures you use to identify opportunities to better align with national requirements and performance-based payment incentives. See which alliances are already using specific measures to learn from their practical experience and inform your implementation efforts.

IDEA 4: See who is using measures in areas where you want to align or expand, then learn from their experience to inform your implementation plans

Scan the Alignment Tool to identify measures that are similar to measures you are using, and then compare them in the [Quality Positioning System](#). If the measures are in use by the AF4Q Alliances in Cincinnati, Detroit, or Maine, review their measurement experience information. Or contact any of the 16 AF4Q Alliances that are already using the measure(s) of interest to you to learn about their experiences ([Resources List](#)).

IDEA 5: Consider how others describe measures in their public report to avoid duplication of effort and increase consistency in approaches

Identify NQF-endorsed measures you are using or would like to use. Then, if the measures are in use by the AF4Q Alliances in Cincinnati, Detroit, or Maine, see the [Measurement Use Experience document](#) for examples of plain language versions of the measure name. Or contact any of the 16 AF4Q Alliances that use the measure(s) to find out how they publicly report on those measures of interest ([Resources List](#)).

IDEA 6: Avoid duplicated effort and increase consistency in public reports by linking any NQF-endorsed measures you use to measure information in QPS

Rather than developing and maintaining your own technical information about each NQF-endorsed measure in your public report, for each measure include the NQF measure number in your public report and hyperlink to the measure's page in the [Quality Positioning System](#).

IDEA 7: Help improve understanding of practical measurement successes and challenges by sharing your measures and 'measurement story'

Create your own portfolio of measures in the [Quality Positioning System](#) and use QPS to submit feedback on specific measures. Tell NQF more about your community or region's measurement and reporting efforts by sending your story to communities@qualityforum.org.

How to Implement These and Other Ideas

Detailed below are the specific ways to use the Tool to implement the above ideas and other potential uses of the Tool:

- Search and find measures (see [page 11](#))
- Sort and filter the content of the Tool to focus on a certain area such as a National Quality Strategy priority area or a national initiative (see [page 11](#))
- Compare measure details (see [page 12](#))
- Compare measures used in certain alliances or national programs (see [page 14](#))
- Explore specific measurement experiences from certain alliances (see [page 17](#))

Search and Find Measures

To locate a particular measure, use the “Find” function in Microsoft Excel³ to search by NQF measure number, keyword, or care setting.

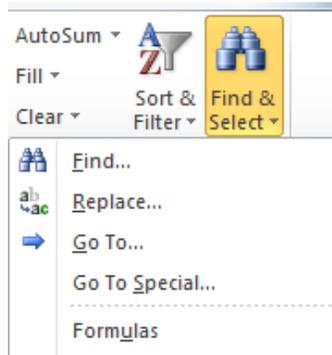

Figure 11: Microsoft Excel 2010 “Find” Function

Sort and Filter the Content of the Tool

For advanced searches, use the “Sort” and “Filter” Excel functions. Figure 12 shows an example of filtering content in the Tool to find measures about ‘screening’.

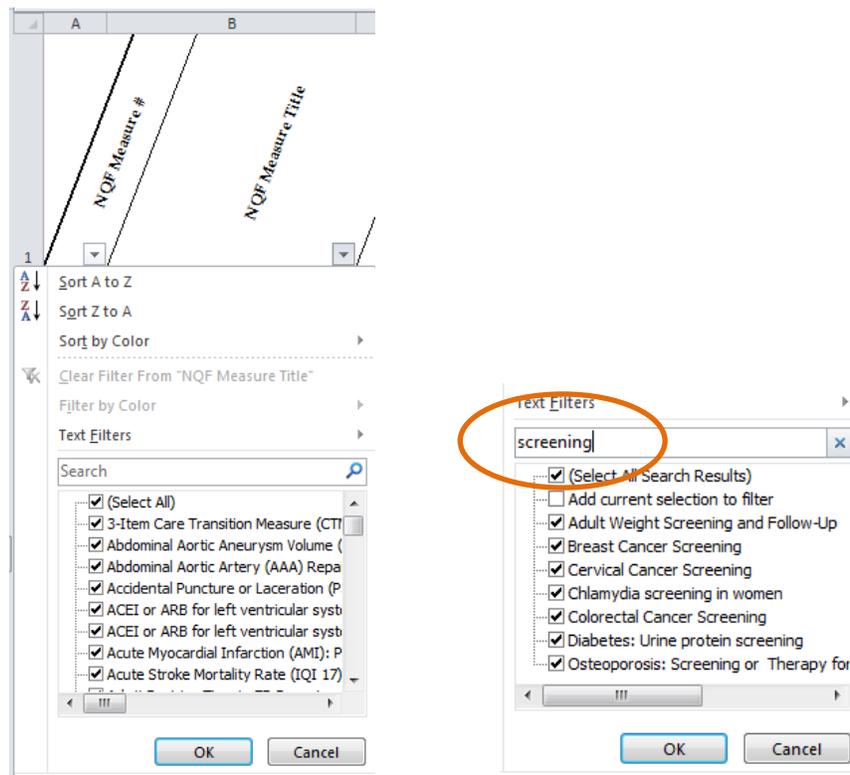

Figure 12: Search Box for Finding Measures in the Alignment Tool

³ This component is a Microsoft Excel 2010 file. If you use earlier versions of Microsoft Office, install the compatibility service pack to use the Tool:

<http://www.microsoft.com/download/en/details.aspx?displaylang=en&id=3>.

Microsoft Excel indicates when a spreadsheet has been filtered or narrowed by displaying a funnel-like icon at the top of a column (Figure 13).

| | NQF Measure # | NQF Measure Title | Care Setting | Affordability |
|---|----------------------|-----------------------------|------------------|---------------|
| 1 | | | | |
| 2 | 0031 | Breast Cancer Screening | Clinician Office | |
| 3 | 0032 | Cervical Cancer Screening | Clinician Office | |
| 4 | 0034 | Colorectal Cancer Screening | Clinician Office | |
| | | Diabetes: Urine protein | | |

Figure 13: Indication in Microsoft Excel that Results are Filtered

Compare Measure Details

To find and use measure details (numerator, denominator, exclusions, measure steward, and other information) in NQF’s online measure search tool, the [Quality Positioning System \(QPS\)](#), follow these steps:

- From the Alignment Tool, click on the hyperlinked NQF measure number (Figure 14).

| | NQF Measure # | NQF Measure Title | Clir |
|---|----------------------|---|------|
| 1 | | | |
| 2 | 0001 | Asthma assessment | Clir |
| 3 | 0002 | Appropriate testing for children with pharyngitis | Clir |
| 4 | 0005 | CAHPS Clinician/Group Surveys - (Adult Primary Care, Pediatric Care, and Specialist Care Surveys) | Clir |

Figure 14: NQF Measure Number Hyperlinked to QPS

- You will be taken to that measure’s details in QPS (Figure 15).

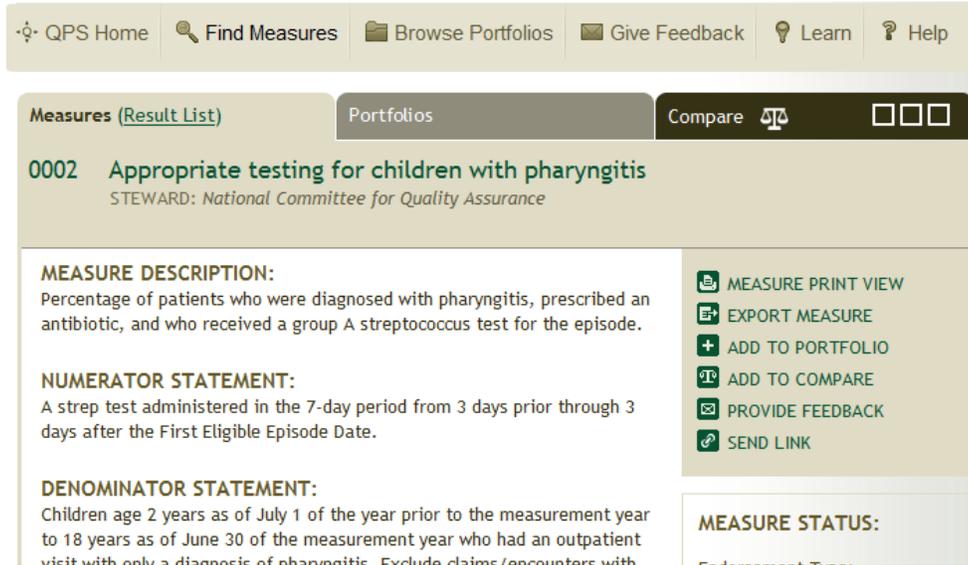

Figure 15: Measure Details in QPS

- In QPS, to add a measure to a comparison, click on “Add to Compare” from the action menu in the measure details page (Figure 16). Use the Alignment Tool or QPS to find additional measures of interest. You can compare up to three measures at a time.

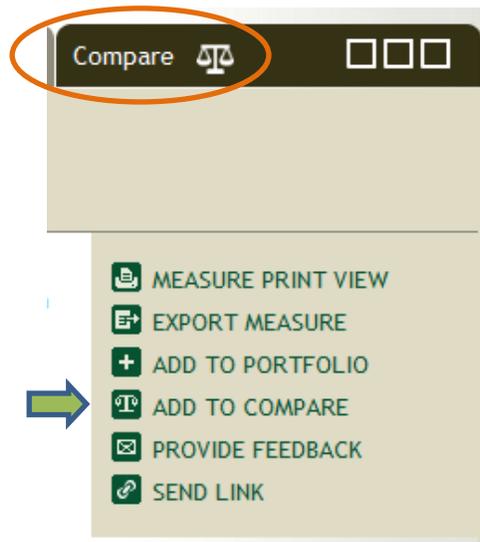

Figure 16: How to Compare NQF-endorsed Measures in QPS

- To add the portfolio to a comparison, click on “Add to Compare” from the action menu in the portfolio’s page in QPS (Figure 19). Use the Alignment Tool or QPS to find additional portfolios of interest. You can compare up to three portfolios at a time.

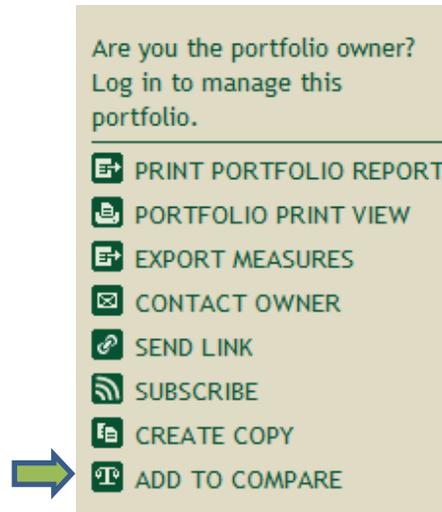

Figure 19: How to Compare Portfolios in QPS on the NQF Website

- To view the list of all 16 AF4Q Alliances’ published portfolios in QPS, search QPS portfolios using the keyword “AF4Q” (Figure 20).

Figure 20: How to Search for All AF4Q Alliances’ Published Portfolios in QPS

While the information in the Tool is a ‘snapshot in time’, the portfolios published in QPS provide the most up-to-date information for the NQF-endorsed measures in use in the 16 AF4Q Alliances.

- Figure 21 shows a comparison in QPS of an AF4Q Alliance portfolio to a national program’s portfolio.

Explore Specific Measurement Experiences from Certain Communities

In Part II of the Alignment Tool – the [Measure Use Experience document](#) – the Cincinnati, Detroit, and Maine AF4Q Alliances provide details on their measurement and reporting efforts for some of their measures in use. A hyperlinked “1” in the spreadsheet component of the Tool indicates that more information can be found in the Measure Use Experience document. See Figure 22 for an example of a measure-specific experience summary.

NQF #0064: Diabetes Measure Pair: a. Lipid management: low density lipoprotein cholesterol (LDL-C) < 130, b. Lipid management: LDL-C < 100

AF4Q Alliances Using This Measure (10): Albuquerque; Cincinnati; Cleveland; Detroit; Humboldt County, CA; Kansas City, MO; Maine; South Central PA; West Michigan; Wisconsin

Plain Language Measure Name Example(s):

- “Keep bad cholesterol (LDL) under 100 mg/dl” (Cincinnati AF4Q)
- “Controlling cholesterol for patients with diabetes” (Detroit AF4Q)
- “Triglycerides” (Maine AF4Q)

Cincinnati AF4Q Measure Selection: This measure is part of the diabetes composite score from Minnesota Community Measurement (MNCM), as well as for Bridges to Excellence (BTE) and National Committee for Quality Assurance (NCQA) recognition scoring.

Cincinnati AF4Q Impacts Observed: The 2010 Greater Cincinnati Regional Average for this measure is 56%. This means that 56 out of 100 diabetes patients have bad cholesterol under control.

[View Cincinnati AF4Q’s general approach to measurement and reporting](#)

Figure 22: Example of Measure-Specific Information Found in Part II of Tool

The Cincinnati, Detroit, and Maine AF4Q Alliances also contributed detailed accounts of their measurement and reporting experiences. Each community’s ‘measurement story’ provides details on the following areas:

- Community profile
- Measure selection
- Data source(s)
- Measure details
- Plain language
- Use of measure results
- Impacts observed
- Experience using its measures
- Contact information

Figure 23 shows an excerpt of the information included in one of the measurement stories.

Measure Selection – How and why Maine decided to use specific measures

Maine relies as much as possible on national metrics and performance measurement according to the following principles:

1. Utilizing performance measurement results produced by national or regional entities pursuant to vetting and endorsement by appropriate Pathways to Excellence Steering Committees. MHMC will only collect and analyze data when it is not available from other entities or when collecting it themselves would drive more beneficial change or be more cost effective.
2. Adopting and utilizing all available performance measures endorsed by the National Quality Forum, AQA Alliance, and other expert entities unless there is a technical or compelling reason to reject an individual measure.
3. Recognizing the differences among measures that measure high performance and those that measure basic competency or minimum thresholds of performance.

These principles led Maine to focus its data collection and reporting efforts on areas and conditions where data on outcomes of care could be assessed through measurement. For primary care practices, Maine reports ratings on the following areas of focus through its PTE program:

Office Systems: using a standard office systems survey that queries practices for use of systems known to improve quality and safety, such as use of Electronic Health Records (EHRs), chronic disease registries, e-prescribing, and nurse care management. Maine has a new “Advanced Primary Care” recognition program designed to recognize those practices moving toward becoming patient-centered medical homes.

Adult Care Clinical Outcomes: for conditions such as diabetes, and cardiovascular clinical outcomes, using national recognition programs such as the Bridges to Excellence (BTE) and National Committee for Quality Assurance (NCQA) physician recognition programs. Maine will be adding recognition for other clinical recognition programs from BTE or NCQA as they are developed.

Specialty Care Systems of Care and Clinical Outcomes: for care by cardiovascular and orthopedic specialty care providers.

Pediatric Care Clinical Outcomes: for delivery of chronic care for children, including asthma, and for delivery of preventive services, such as immunizations.
