Antitrust Compliance Statement

It is the policy of the Core Quality Measures Collaborative (CQMC) to conduct all of its activities in compliance with federal and state antitrust Laws.

During CQMC meetings and other association activities, including all informal or social discussions, each member shall refrain from discussing or exchanging competitively sensitive information with any other member.

Such information includes, but may not be limited to:

- Prices, premiums, or reimbursement charged or paid for products or services
- Allocation of customers, enrollees, sales territories, sales of any product or contracts with providers
- Refusal to deal with any customer, class or group of customers
- Refusal to deal with any provider, class or group of providers
- What products or services will be offered to enrollees
- Any other competitively sensitive information that is proprietary to a member company

If you have any questions or antitrust concerns related to CQMC programs, meetings, or activities, consult with your own counsel.

Discussion Question

- What can we draw from the examples presented during this cycle of meetings to help inform the implementation of CQMC Core Sets?

Potential Case Studies

Regional Collaborative Models Case Studies

Integrated Healthcare Association (IHA) – AMP Report cards

Kentuckiana Health Collaborative (KHC) – Consolidated Measurement Reports

Wisconsin Collaborative for Healthcare Quality (WCHQ) – Performance and Progress Reports

Regional Collaborative Considerations

- Are there other collaboratives/collaborative models we should explore for inclusion as case studies?

- What aspects are most important to include in the Guide?

Core Set Implementation Case Study

- Screening Colonoscopy Adenoma Detection Rate (MIPS ID 343) from the CQMC Gastroenterology core set

- 3-4 health systems/providers' journey to report this measure

Core Set Implementation Questions

- Are there other examples like this that we should consider for inclusion as case studies?

- What aspects are most important to include in the Guide?

Collection of Race, Ethnicity, and Language Case Study

- Minnesota Community Measurement (MNCM) has been collecting this data for years

- Alternately, could include Handbook on the Collection of Race/Ethnicity/Language Data in Medical Groups as a resource

Race, Ethnicity, and Language Questions

- Does this rise to the level of a case study or is including as a resource sufficient?

- If included as a case study, what aspects are most important to include in the Guide?

Case Study Questions

- What additional case study topics would be helpful for inclusion?

Recommended Updates to the Implementation Guide

Additional Updates to the Implementation Guide

- Updating tools and resources

- Reviewing for outdated content

- Other updates needed?

Next Steps

Next Steps (cont.)

- Distribute web meeting summary to the Workgroup
- Share updated draft of Implementation Guide in late May
