March 15th Webinar:

eMeasure Implementation: Implications in Small Practice Settings

Time: 12:30 PM – 2:00 PM ET/ 11:30AM – 1:00PM CT

Purpose:

- To provide information related to the eMeasure implementation within small practices (e.g., physicians, private practices and clinics).

Featured Speaker:

- Shawn P. Griffin, MD, Chief Quality and Informatics Officer, MHMD - the Memorial Hermann Physician Network

March 15th Webinar:

eMeasure Implementation: Implications in Small Practice Settings

Learning Objectives

Participants will be able to describe:

- The importance of advancing eMeasures in small practice settings
- Best practices in implementing eMeasures within ambulatory electronic health records (EHRs)
- eMeasure implementation results, challenges, and future work
- The mission of NQF's eMeasure Learning Collaborative and its value to small practice providers

April 26th In-Person Collaborative Meeting

Best Practices for eMeasure Implementation

- **Title: Best Practices for eMeasure Implementation**
- **Date: Thursday April 26th 8 AM – 4 PM ET**
- **Location:** NQF Offices, 9th Floor Conference Center
1030 15th Street, NW
Washington, DC 20005
- **Charge: Free**
- **In-Person Meeting & Virtual Meeting**
 - In-person attendees will be limited to 100
 - General session meeting and breakouts will be broadcast via the web for those unable to attend in person

April 26th In-Person Collaborative Meeting

Best Practices for eMeasure Implementation

Objectives

- Advance knowledge and practice related to the development and implementation of eMeasures across all settings of healthcare;
- Drive greater uptake of eMeasures and movement toward use of an electronic platform for quality measurement;
- Promote awareness, provide education, and enable understanding of best practices with eMeasure implementation across various healthcare settings; and,
- Allow knowledge sharing between all stakeholders involved in quality and performance measurement thereby expediting advancement in electronic quality measurement.

April 26th In-Person Collaborative Meeting

Best Practices for eMeasure Implementation

Keynotes Confirmed: *Thursday April 26th*

- Farzad Mostashari, MD, ScM
 - National Coordinator for Health Information Technology

- Kate Goodrich, MD
 - CMS, *Senior Technical Advisor, Office of Clinical Standards & Quality*

Breakout Groups

1. Implementation *Acute*
2. Implementation *Small Practice*
3. Technical
4. Clinical Data Analytics
5. Innovation

Methods

1. Use cases showing how facilities are doing eMeasurement today
2. Use cases describing how facilities are expanding beyond what they have today
3. Sharing of examples for the future

Best Practices for eMeasure Implementation

- Clinical Data Analytics Track breakout ideas per discussion with Chris Snyder

April 26th In-Person Collaborative Meeting

Best Practices for eMeasure Implementation

Four Questions the Collaborative to Answer

1. ***What are best practices examples*** related to the development and implementation of eMeasures in the acute and ambulatory settings (small practice settings)?
2. ***What are the mechanisms to enhance data and workflow capability?***
3. ***What are the recommendations*** for future use of health IT and standards to enable performance measurement
4. ***How can we “rethink” what we are looking for?***
5. ***(PROPOSED) How can we enhance the data and workflow capabilities with what have today? What would you like to be doing or see in the future?***

April 26th In-Person Collaborative Meeting

Best Practices for eMeasure Implementation

1. ***What are best practices examples*** related to the development and implementation of eMeasures in the acute and ambulatory settings (small practice settings)?
 - What structured data sources are available today to develop (represent) an eMeasures?
 - What data sources are available for implementation of an eMeasure (available in health IT)?
 - What are best practice examples showing how data capture and clinical workflow interoperate?
2. ***What are the mechanisms to enhance data and workflow capability?***
3. ***What are the recommendations*** for future use of health IT and standards to enable performance measurement
4. **How can we rethink what we are looking for?**

Best Practices for eMeasure Implementation

1. *What are best practices examples* related to the development and implementation of eMeasures in the acute and ambulatory settings (small practice settings)?

2. *What are the mechanisms to enhance data and workflow capability?*

- What data sources are not available in structured format for reporting and why?
- What are the challenges in expressing and interpreting eMeasures?
- What techniques are used to address unstructured data?

3. *What are the recommendations* for future use of health IT and standards to enable performance measurement

4. How can we rethink what we are looking for – innovative ideas

2. *What are the mechanisms to enhance data and workflow capability?*
3. *What are the recommendations* for future use of health IT and standards to enable performance measurement
 - What concepts are needed to address requirements for future measurement?
 - What innovative techniques are needed to capture structured data and manage clinical workflow to enable performance reporting as a byproduct of care delivery?
 - What are the methods for MU Stage 2?
4. *How can we rethink what we are looking for – innovative ideas*
